

Kondayama Biofuel Investment

Promoting Clean, Affordable & Locally-Made Cooking Solutions

Proposal for Clean Cooking Energy Campaign in Sierra Leone

"Clean Flame Sierra Leone: Advancing Health, Environment, and Women's Empowerment through Ethanol Cookstoves"

1. Background

Over 90% of households in Sierra Leone rely on solid biomass (wood and charcoal) for cooking. This results in deforestation, indoor air pollution, and serious health risks-especially for women and children. Traditional cooking also contributes to greenhouse gas emissions and environmental degradation.

2. Our Solution

Kondayama Biofuel Investment offers locally manufactured ethanol cookstoves and safe ethanol cooking fuel. These solutions are clean, affordable, renewable, and women-friendly-designed to replace the harmful use of wood and charcoal.

3. Objective of the Campaign

To promote clean cooking energy across Sierra Leone by:

- Raising awareness about clean cooking and ethanol solutions
- Conducting live cookstove demonstrations in communities and schools
- Distributing ethanol stoves and fuel at affordable rates
- Training women and youth as clean energy agents

4. Campaign Activities

- Sensitization Events (markets, radio, town halls)
- Stove Demonstrations (schools, communities, institutions)
- Subsidized Stove Access for low-income households
- Capacity Building for women entrepreneurs and fuel vendors

5. Expected Results

- 1,000+ households switch to clean cooking

Kondayama Biofuel Investment

Promoting Clean, Affordable & Locally-Made Cooking Solutions

- Reduced exposure to smoke-related illness
- Women empowered through new jobs and safer kitchens
- Lower deforestation and carbon emissions

6. Call to Action

We invite partnerships, funding, and technical support from:

- Government ministries and local councils
- NGOs and community-based organizations
- Donor agencies and corporate CSR programs
- Universities and innovation hubs

Together, we can drive sustainable energy adoption in Sierra Leone.

7. Budget Summary

A detailed budget will be provided based on partnership level, including:

- Stove production & logistics
- Ethanol fuel distribution
- Outreach & demonstration events
- Training and monitoring tools
