

Todd Campbell

Principal Development Advisor, Owner, Clean Economy Works LLC

Todd has worked on energy, rural, and agriculture policy and issue advocacy for the past 20 years with a goal of improving the quality of life through economic development. He is formerly Senior Policy Advisor for Energy and the Bioeconomy at the United States Department of Agriculture in the Office of the Secretary and Chief of Staff for the Rural Development mission area. In his seven year with the Department, he managed work on regulation development, program implementation, and special initiatives in a number of priorities areas in support of an efficient, renewable, and biobased economy in the United States. He served as a member of the Bioeconomy Council Coordination Committee, USDA Science Council, USDA Climate Hub Executive Committee, Operations Committee for the Biomass Research and Development Board and has led work for the Department on commercial aviation biofuel through development of the Farm to Fly initiative and methane utilization with the Biogas Opportunities Roadmap and through a partnership with the Innovation Center for U.S. Dairy. Todd has assisted dozens of companies through almost \$200 million of business development from a small logging operation installing firewood kilns to multiple dairy renewable natural gas projects. He is experienced steering integrated demonstration unit campaigns, doing complex feasibility analysis for all aspects of biobased manufacturing and renewable energy projects, and generating economic impact studies for regional economic development. Todd grew up in a small town in Western Iowa, and now raises his three boys with his wife on their farm in Vermont.
