Renewable Energy
[national policy conference](#) talks

The American Council on
(ACORE) [renewable energy](#)
place on December 6-7 in
Washington, DC. This year
they have a section on
transportation energy. We at
Advanced Biofuels USA
would certainly like to see
many of you there representing the advanced biofuels perspective
and explaining the benefits of ethanol and other sustainable
RENEWABLE fuels.

' v:shapes="_x0000_s1028"> Coming up January 27-

February 5, [The Washington Auto Show](#) is one of the most fun
events. Considered the "public policy show" on the auto show
circuit, it focuses on the intersection of public policy with

innovations in safety and sustainability.

This year's theme is "Safety and Sustainability in Motion," a point underscored by the "**Advanced Technology SuperHighway**," a 65,000-square-foot exhibit of the latest solutions in the industry, including Evs, biofuels and the other prospects for energy efficiency and security. The show draws key policy makers, Cabinet secretaries, industry leaders and international media. It is also the largest public show in Washington and draws one of the nation's most educated and affluent consumer audiences.

Advanced Biofuels USA plans to cover Policy days, as long as devastating snow storms don't foil our plans [as they did last year](#).

[The Washington Auto Show Policy Summit on Capitol Hill](#), produced in partnership with *National Journal* and *The Green Car Journal*, will address the role of the automotive industry in the new economy and policy implications for a sustainable industry. SAE will also continue to co-locate its Annual Government/Industry Meeting at this show.

New

Sponsor:

EcoEngineer

S

v:shapes="_x0000_s1029">Advanced Biofuels USA is especially grateful to EcoEngineers for joining our Sponsors' Box. Displaying the logos of our financial supporters on every page of our web site is how we thank them for their generosity. A new member of that group is EcoEngineers.

[EcoEngineers](#) educates and assists renewable fuel producers with the Renewable Fuel Standards (RFS2) and the related issue of Renewable Identification Numbers (RINS). They have conducted over a hundred Third Party Engineering Reviews for ethanol and biodiesel plants (domestic and international) as required under RFS2 and submitted registration packages on behalf of producers under Part 79 and Part 80 of the regulations. They are members of both the National Biodiesel Board and the Renewable Fuels Association.

If you or your company would like to join EcoEngineers and our other sponsors in that special web site box, contact Joanne Ivancic at [info @ AdvancedBiofuelsUSA.org](mailto:info@AdvancedBiofuelsUSA.org).

Projects Underway: Education

American Association of Community Colleges launches a new [Transportation and Fuels resource section](#) on its Sustainability Education and Economic Development (SEED Center) web site, [featuring Advanced Biofuels USA](#). Over the past few months, Advanced Biofuels USA volunteers, particularly board member Doug Root, provided resource information to AACC as they worked on adding biofuels and sustainable renewable transportation fuels information to its SEED website.

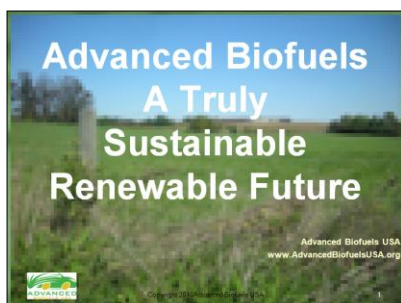

We are happy to see the launch of this section, along with another new, related section on [Sustainable Agriculture, Food and Land](#). This resource, directed at community colleges and career prep schools faculty, staff and students, can also serve as a valuable resource for others interested in education on these topics. It provides not only curriculum materials and resources, but also links to studies on employment industry projections, along with information on certification and industry credentials and much more.

See a short article about the [promise of biofuels](#) by Joanne Ivancic on the SEED New Sectors page.

Resource for Journalists

Advanced Biofuels USA strives to provide a well-rounded source of information for a variety of audiences from legislators and their staffs at local, state and federal levels to journalists and reporters to students, teachers and the general public, as well as to industry professionals in all aspects of the value chain. We often provide one-on-one consultation with a variety of individuals; and do occasional interviews with reporters for the record and on background. We often refer reporters and others to a variety of resources in addition to those on our web site. Don't hesitate to call or write.

Telling Our Story

Initially prepared for a middle school class, "What's So Advanced About Advanced Biofuels?" grew and is appropriate for any individual or group beginning to think about advanced biofuels.

The presentation answers the questions: What Are Advanced Biofuels? Why Are They Important? What Are They Used For? How Are They Made? Can We Buy Them NOW?

It also includes a class/group activity to develop a deeper understanding of the concept of sustainability from economic, environmental and social perspectives. After the exercise and a review of some elements pertinent to each of those legs of the sustainability analysis stool, the presentation goes into deeper discussions of the make-up of plant cells, explanations of cellulose, hemicellulose and lignin.

We hope in future presentations or additions to this presentation to delve into the properties and construction of algae and cyanobacteria, as well. The presentation wraps up with a list of jobs related to an advanced biofuels industry.

The materials are provided in PDF documents on the [Slides and Presentations for Public Use](#) page of the Biofuels Basics section of our web site. If you would like access to the original PowerPoint slides with teaching narrative notes, please contact Joanne Ivancic at [info @ advancedbiofuelsusa.org](mailto:info@advancedbiofuelsusa.org).

[Download "What's So Advanced About Advanced Biofuels?" presentation](#)

[Download "What's So Advanced About Advanced Biofuels?" presentation NOTES pages](#)

Jason Rathod accompanied **Joanne Ivancic** to Oakdale Middle School in Frederick, Maryland and caught this shot of her presentation to **Anita Waravdekar's** science classes,

Using the above materials. Ivancic remarked on the stamina it takes to teach animated 8th graders all day and wondered if people really appreciate what goes into being an effective teacher.

class, in small group activities, complex challenges facing the deployment of advanced biofuels, brainstorming sessions resulting in

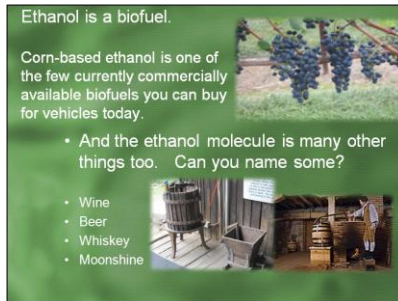

She also noted that this grasped some of the most development and and had effective viable ideas for solving them.

They were developing concepts that highly paid government and private professionals were just beginning to grasp themselves. For example, one group discussing carbon life cycle analysis soon concluded that if the transportation trucks, farming

equipment and refineries were operating using renewable fuels and biofuels, the carbon footprint would be much better than it is now while they have to use fossil fuels because the others aren't as available.

Another group decided that since it cost so much to transport raw biomass long distances, it would be good to find ways to convert the biomass so that it could be taken further for the same cost.

An interesting note was that the students didn't realize at first that the ethanol in fuel was the same as the ethanol in wine, beer, spirits, and in the "moonshine" made not so long ago in the hills they could see from the classroom window. Many adults also fail to make that association.

As Always: Keep an eye on our web site category "[Education](#)" and its subcategories such as "[Education: For Teachers](#)," as well

as the [Biofuels Basics](#) section with it's page of [Slides and Presentations for Public Use](#). We'll share information about educational materials and projects as we hear about them. If you have developed teaching materials or projects about biofuels and advanced biofuels that you are willing to share, please contact us at info@advancedbiofuelsusa.org."

Upcoming Advanced Biofuels Conferences and Activities: Some Details

▪ **4th Algae World Asia November 15-16, 2011
Beijing, China**

*"Resource Potential Analysis, Experience And Facilities For
Algae Production In Asia/China"*

Key highlights

- Commercial viability and economic analysis
- Challenges in bringing algae to commodity scale – can we grow enough algae, at what cost?

- Can Algae be an alternative protein source for animal feed and for the growing aquaculture industry ?
- Genetic Engineering of Microalgae to produce high-end products
- Large Scale Cultivation of MicroAlgae in diverse wastewater
- Improving economics of downstream processing/extraction technologies

Optional Site Visit on 16th Nov Afternoon ENN International Algae Facility [READ MORE](#)

Biofuels International expo & conference
November 16-17, 2011 Antwerp, Belgium

Hosted annually, **Biofuels International expo & conference** attracts biofuel producers and plant owners. Organised by the leading publication, Biofuels International (www.biofuels-news.com), the event is now celebrating its fourth year in Europe.

After the global 2010 recession the biofuels market in Europe is looking forward to a prosperous 2011 and sustained growth. With the European biofuel market gaining support from the government and the public, the event has relocated to the Antwerp Expo to offer a larger exhibition with a diverse offering of exhibitors and speakers. With conference topics including regional reports, biofuel use, economics and challenges, Biofuels International offers its attendees an insight into the European Biofuel market.

Future World of Biogas: Europe 2011 November
23-24, 2011 Copenhagen, Denmark

ACI's **Future World of Biogas: Europe 2011** will be bringing together biogas industry leaders and experts who will head two days of talks and presentations looking at the most current developments and strategies for producing biogas. We will hear and discuss the most up-to-date and effective technologies, strategic solutions and innovations heading this growing industry sector in an informative and thought provoking platform ideal for meeting and networking with your peers.

Future World of Biogas: Europe 2011 will be looking at the future potential of biogas as an energy source and what areas will expect maximum growth. We will also look at case study examples of biogas power plant developments including strategies implemented, considerations when planning and evaluating power purchase agreements.

The two day conference will comprise of a series of informative formal presentations from senior executives and experts including panel discussions, allowing you to maximise the productivity of your two days at the event.

Key areas of discussion:

- European biogas policy and regulatory assessments

- Current and future biogas market overviews
- Raw materials for biogas production
- Strategies for setting up a biogas plant
- Case study examples from biogas production facilities
- Commercial challenges for expansion
- Current and future technological developments
- What direction will biogas will take in the future [READ MORE](#)

•

Biobased Feedstocks For Fuels & Chemicals
November 28-29, 2011 Singapore

The conference will highlight the following issues: Economic Feasibility of Current Pretreatment & Conversion Technologies [READ MORE](#)

- Availability & Sustainability of Supply of Agricultural Waste & Woody Biomass from **South East Asia & South America**
- Price Determinants & Economics of Conversions
- Joint Ventures & Collaboration Potential (e.g. Upward/Downward Integration in the Value Chain)
- Competing Usages/Applications of Feedstock (**Biofuels**, Biobased **chemicals** & Biomass-to-power)& Opportunity Costs
- Scrutiny of Sugar, Oil and Cellulose-based Feedstock for Bio-Applications [READ MORE](#)

Canadian Renewable Fuels Association 8th Annual Summit **November 28-30, 2011 Calgary, Alberta, Canada**

The Canadian Renewable Fuels Association's (CRFA) 8th Annual Summit is being held at The Westin Calgary in beautiful downtown Calgary Alberta from November 28 to 30, 2011. This year's theme is **Growing Our Energy Diversity** and will attract participants from across North America and all corners of the ethanol and biodiesel

industries, including grain and cellulose ethanol producers, biodiesel producers, Canada's leading petroleum companies and agriculture associations.

Canada is now a frontrunner in the worldwide effort to create clean, renewable sources of transportation fuel. From an economic standpoint, our industry generates \$2 billion in economic activity each and every year and has created more than 14,000 jobs in total – most of those in rural Canada. At the same time, renewable fuels production will help to reduce GHG emissions by over 4.2 mega-tonnes. This is the equivalent of taking over 1 million cars off the

road each and every year. [READ MORE](#)

**Commercial Aviation Alternative Fuels Initiative
General Meeting and Expo November 30-
December 1, 2011 Washington, DC**

The CAAFI **General Meeting** is the meeting place where alternative aviation fuel professionals from throughout the world gather to discuss, and solve, the challenges they face, and map the future of this new dynamic industry. The “by-invitation-only” CAAFI Conference format includes high-level keynote addresses from government and industry leaders, panel presentations, large and small group discussions, break-out sessions, and a series of networking events.

This year’s **CAAFI General Meeting** has two component parts: A ‘by-invitation-only’ Conference for alternative aviation professionals, and an Expo that will introduce the industry to a larger audience. The Expo is located immediately adjacent to the conference room, providing a way for fuel producers and others in the industry to showcase the products they offer and the approaches they are taking. •

**Bioenergy International Asia Expo & Conference
December 7-8, 2011 Kuala Lumpur, Malaysia**

The Bioenergy International Asia Expo & Conference has been held in Kuala Lumpur for the previous two years. The 2010 sell out event proved successful and popular and attracted over 300 attendees. With a growing circulation of Biofuels International and the surrounding international businesses specialising in Biofuel production the event has moved to a larger venue - the Kuala Lumpur Convention Centre, Kuala Lumpur.

The two day event features an exhibition with international companies showcasing themselves and innovative ideas. The conference includes a full programme of current topics performed by key industrial figures. The event enables business to business networking in a friendly and accessible location. [READ MORE](#)

2nd Annual Global Biofuels Summit January 25 - 26, 2012 Barcelona, Spain

Seven different perspectives about biofuels from the world's leading companies.

Our international panel of expert speakers from representing regulatory bodies, oil&gas companies, biofuel producers, automotive companies, the aviation industry, research centres and banks will each cover biofuel and the most critical of issues in

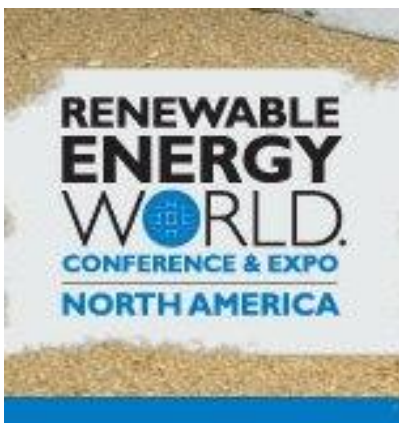

their own perspectives.

A variety of presentations from leaders from the different industries and companies such as **logen, Air France, Petrobras, ExxonMobil, Neste Oil, Credit Suisse, PKN Orlen, British Airways, Ford of Europe, Rabobank, Mossi & Ghisolfi Group** and many others will give attendees a more complete understanding of how to tap the potential of biofuels. You can also be a part of our round table sessions and panel discussions. [READ MORE](#)

2nd Annual Municipal Solid Waste to Biofuels Summit February 7-8, 2012 Chicago, IL

- Following a hugely successful event in Chicago, [Renewable Waste Intelligence](#) is proud to present the 2nd Annual Municipal Solid Waste to Biofuels Summit. This essential forum is designed specifically to facilitate business meetings with investors, biofuels developers, waste management executives, local and state officials... Form effective partnerships and meet the people that matter. The 2nd Annual Municipal Solid Waste to Biofuels Summit takes a unique approach to ensure maximum value and time well spent. [READ MORE](#)

Renewable Energy World Conference & Expo North America February 14-16, 2011 Long Beach, CA

- Please join us for the ninth annual Renewable Energy World Conference & Expo North America – North America's leading all renewable event.

Why Attend?

- Stay up-to-date with the latest technological advancements in all the renewable energy sectors through attending this ONE event
- Network with colleagues and business prospects during the co-located networking events
- Share best practices in the interactive conference sessions
- Receive in-depth training in a Competitive Power College (CPC) Pre-Conference Workshop
- Gain Professional Development Hours

Who Attends?

- Power Generating Utilities, Independent Power Producers, Municipal Utilities and Cooperatives
- Local, State and Federal Government
- Energy Advisory and Planning Agencies
- Research and Training Institutions
- Large Energy Users
- Renewable Energy Site Owners and Managers
- Manufacturers of Renewable Energy Systems
- Consultants in Renewable Energy
- Renewable Energy Architects, Engineers and Construction Representatives [READ MORE](#)

World Biofuels Markets Congress & Exhibition

March 13-15, 2012 Rotterdam, Netherlands

The World Biofuels Markets Congress & Exhibition returns to Rotterdam for 2012, to once again bring together the entire value chain of the biofuels industry to do business..

EUROPE'S LARGEST BIOFUELS CONGRESS & EXHIBITION:

- **1500+ attendees from 80 countries**
- **70% of attendees at Director+ level**
- **2 months** of travelling condensed into **3 days** of networking and meetings
- **275 expert speakers** in **25 focused sessions** with **2 co-located conferences**
 - **70 exhibitors** so you can meet the market leaders and learn more
 - **25 hours** of networking time in the co-located exhibition area [READ MORE](#)

- **The World Congress on Industrial Biotechnology & Bioprocessing April 29 - May 2, 2012 Orlando, FL**

The World Congress on Industrial Biotechnology and

Bioprocessing is the world's largest industrial biotechnology event for business leaders, investors and policy makers in biofuels, biobased products, and renewable chemicals. Entering its ninth year, the event is expected to bring together more than 1,000 high-profile scientists, executives, government officials and investors for an exchange of ideas in Orlando.

The event offers unique networking opportunities, an overview of the latest technological developments, and real world scenarios for bringing technological solutions to market. The Congress features discussions of high profile topics related to climate change, sustainability, new sources of fuel, financing, and policy. The conference also offers business partnering opportunities, utilizing a computer system that assists companies and investors alike in arranging confidential one-on-one meetings with other attendees.

A Poster Session and Exhibit Hall will provide attendees with an unparalleled opportunity to converse with their colleagues and learn about the latest developments in the field of industrial biotechnology and bioprocessing. We are excited to bring this conference to Toronto to highlight the industry's growth, the importance of this industrial and environmental biotechnology for generating green jobs, making greener products and cleaner processes all aimed at building a biobased economy. ACI's European Biodiesel Summit June 13-14, 2012 Krakow, Poland

The leading annual event specifically for the European biodiesel industry, ACI's European Biodiesel Summit will be taking place on 13-14 June 2012 in Kraków, Poland. The previous events held in Brussels, Prague, Barcelona and Rotterdam have attracted senior executives from all areas of the biodiesel industry including agribusiness, feedstock traders and suppliers, transportation companies, biodiesel producers, oil refiners, NGOs, financiers, automotive companies, technology providers and plant manufacturers among others.

Gain direct access to the senior level audience through enhanced visibility and exposure to attract new business. A wide range of opportunities are available, all of which can be finely tuned to match your exact requirements.

LOTOS Biopaliwa's Czechowice-Dziedzice Biodiesel Plant Afternoon of Tuesday 12th June Limited to 30 conference attendees. [READ MORE](#)

PALMEX RIAU 2012 July 5-7 Pekanbaru, Indonesia

PALM OIL RIAU EXPO 2012 will be held on 5 – 7 July 2012 at Labersa Grand Hotel and Convention Center, Pekanbaru, Riau, Indonesia.

The 2nd Edition of PALMEX RIAU 2012 is the only specialized Palm Oil event in Riau that brings together an international congregation of both upstream and downstream palm oil companies and also its supporting industries gathered in the capital city of Pekanbaru, Riau to showcase the latest technologies and

developments in the palm oil industry.

Brought to you by [Fireworks Exhibitions & Conferences](#), organizer of the world's largest Palm oil technology event "[PALMEX Indonesia](#)" and also the highly successful palm oil technology events in the region, "[PALMEX Malaysia](#)" and "[PALMEX Thailand](#)"

For further information, please visit our website www.palmoilriau.com or send any email to info@asiafireworks.com [READ MORE](#)
