Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us!

Visit with Lais Thomaz at the Biofuture Summit 17 in Hotel Estanzola International, São Paulo - Brazil

There is an emerging international consensus that [scaling up modern bioenergy is both necessary and can be done sustainably](#). Policy makers from the [20 Biofuture founding countries](#), industry stakeholders, researchers and others will meet at the first Biofuture Summit São Paulo and exchange experiences on the best ways to do that! Lais Thomaz will represent Advanced Biofuels USA at this event.

The Summit is jointly organized by the government of Brazil as a Member of the [Biofuture Platform](#), a 20-government multilateral initiative; and by the [below50](#) alliance, supported by the World Business Council on Sustainable Development ([WBCSD](#)) and led in South America by the Brazilian Business Council for Sustainable Development ([CEBDS](#) in portuguese). It will combine two different events: the first Biofuture Platform policy conference and the [below50](#) Roadshow.

The Summit aims to highlight the urgent need to scale up the use of sustainable bioenergy in order to keep global temperature within internationally agreed levels, a need made increasingly evident by recent climate and econometric modeling. It will also provide an occasion for a focused debate on what governments, private sector and research institutions can do to overcome the significant challenges ahead and create a large scale, sustainable, low carbon bioeconomy. Visit with Michael Eggleston in October at EFIB, European Forum for Industrial Biotechnology & the Bioeconomy 2017 and at the Global Sustainable Aviation Summit.

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy and **Michael Eggleston**, one of our newest volunteers, will be covering this event for us during his year of study in the EU as he takes a break from research on bio-based batteries and expands his understanding of bio-based fuels, chemicals and products.

Let him know what you are up to these days and watch for his article about the conference in a coming newsletter. [READ MORE](#) And see below for discount

information.

Michael Eggleston will also be covering the Global Sustainable Aviation Summit, hosted by ATAG and co-organised by ACI, IATA, CANSO and ICCAIA in

Geneva, Switzerland October 3-4.

Visit our Exhibit at the Keystone Farm Show from January 9-11, 2018 in York, PA

Thanks to the generosity of Lee Publications, **Peggy Alpert, Bob Kozak** and **Joanne Ivancic** will again staff the Advanced Biofuels USA exhibit at the "Farm Show for Farmers" in York, PA.

Always an opportunity to learn as much as we teach, we look forward to seeing you at the farm show. **For free admission ticket as our guest, email your request to info@advancedbiofuelsUSA.org** [READ MORE](#)

Upcoming Advanced Biofuels Conferences and Activities: *Details, Discounts, Deals*

Christianson PLLP's Biofuels Financial Conference — September 27-28, 2017 — Minneapolis, MN

Produced by Christianson PLLP and organized by BBI International, this year's Biofuels Financial Conference is focused on the best ways to explore new options in today's changing ethanol and biodiesel industries. By understanding risks associated with various technology and marketing initiatives, and by exploring various options for making the best use of capital and resources, attendees will

learn how to create a well-managed plan for growth and change—a plan which maximizes profitability while ensuring future stability and meeting the expectations of all stakeholders.

Sardinia Symposium 2017 — October 2-6, 2017 — Forte Village, Cagliari, Italy

Following the incredible success of Sardinia 2015 / Arts Edition, which saw the participation of 732 delegates from more than 70 different countries from all the continents, we are proud to announce the 30th Anniversary of Sardinia Symposia, the reference forum for the international community since 1987.

In line with tradition, the 16th edition of the conference will focus on advances of Waste Management science and technologies, presenting case studies and discussing key controversial subjects, sharing experiences from different countries, and assessing social and economical balances.

Prior to the start of the Symposium, training courses will be offered by IWWG. [READ MORE](#)

Palmex Indonesia 2017 — October 3-5, 2017 — Medan, Indonesia

The 9th PALMEX Indonesia 2017 is the only specialized Palm Oil event in Asia that brings together an international congregation of both upstream and downstream palm oil companies and also its supporting industries gathered in the capital city of North Sumatera, Medan to showcase the latest developments in the palm oil industry.

North Sumatera, home to one of Indonesia's largest concentration of oil palm plantations and also the presence of many supporting facilities such as palm oil processing plants making its capital Medan the perfect venue for the show. This unique event seeks to educate the public on the importance of the palm oil industry in Indonesia and the future trends of palm oil in the region. More than 7,000 industry professionals from more than 10 countries would be expected to turn up at this event. [READ MORE](#)

10th Biofuels International Conference and Expo — October 4-5, 2017 — Edinburgh, Scotland

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to

reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services. European Forum for Industrial Biotechnology & the Bioeconomy (EFIB) 2017
— October 9-11, 2017 — Brussels, Belgium

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy.

Industrial Biotechnology is currently worth €23 billion representing just 6% in sales of the overall worldwide chemicals market. However, it is significantly outperforming the overall chemicals market at an impressive 20% annual growth rate and has the potential to become the dominant technology of tomorrow's chemicals industry, representing a huge future opportunity.

Delivering on this opportunity will require significant investment, innovation and value chain development and most importantly new collaborations across the sector. Additionally we are faced with important challenges posed by high energy prices, the impact of the shale gas boom on the development of biobased chemicals markets and the ongoing need for predictable, coherent and supportive policy in the EU.

In order to understand and overcome these challenges and prosper in the industrial biotechnology market, industry experts throughout the vibrant and innovative biobased community come together to one central location every year to discuss the key issues and gain a snapshot of the most significant developments on scale up of commercial biorefineries around the world.

That location is the European Forum for Industrial Biotechnology & the Bioeconomy (EFIB), where delegates are provided with an update on the status and outlook of biobased industries. EFIB is proud to foster engagement between policy makers, a broad range of stakeholders connected with the existing biobased value chain and seeks to reach out to, and include, new interlocutors.
