## Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us!

### Visit with Lais Thomaz at the Biofuture Summit 17 in Hotel Estanplaza International, São Paulo - Brazil October 24-25

There is an emerging international consensus that [scaling up modern bioenergy is both necessary and can be done sustainably](#). Policy makers from the [20 Biofuture founding countries](#), industry stakeholders, researchers and others will meet at the first Biofuture Summit São Paulo and exchange experiences on the best ways to do that! Lais Thomaz will represent Advanced Biofuels USA at this event.

The Summit is jointly organized by the government of Brazil as a Member of the [Biofuture Platform](#), a 20-government multilateral initiative; and by the [below50](#) alliance, supported by the World Business Council on Sustainable Development ([WBCSD](#)) and led in South America by the Brazilian Business Council for Sustainable Development ([CEBDS](#) in portuguese). It will combine two different events: the first Biofuture Platform policy conference and the [below50](#) Roadshow.

The Summit aims to highlight the urgent need to scale up the use of sustainable bioenergy in order to keep global temperature within internationally agreed levels, a need made increasingly evident by recent climate and econometric modeling. It will also provide an occasion for a focused debate on what governments, private sector and research institutions can do to overcome the significant challenges ahead and create a large scale, sustainable, low carbon bioeconomy. ### Advanced Biofuels USA Board Member, Todd Campbell, Will See You at ABLC NEXT October 16-17 in San Francisco

Organized to maximize networking opportunities, ABLC NEXT is a connected series of 5 conferences :

1. The Advanced Fuels Summit – focused this year on Advanced Biomass Diesel, BioCrude, Advanced Alcohols and Alternatives to gasoline.
2. The Renewable Chemicals & Biomaterials Summit – focused this year on Novel Performance Chemicals and Advanced Packaging.
3. The Sustainable Brands Summit – the technologies deployed by major brands — and their deployment, communications and performance goals.
4. The Advanced Nutrition Summit – advanced products and technologies for human and animal nutrition — more food, better food, and more customer choice.
5. The BioFrontiers Summit – the 30 Most Compelling technologies and solutions ready for development and commercialization from leading technology developers and labs.

Look for Todd Campbell who will be representing Advanced Biofuels USA in California this year. [READ MORE](#)

**Anaerobic Digestion and Bioresources Association Conference — December 7, 2017 — London, UK**

**NATIONAL  
CONFERENCE**

**7 DECEMBER 2017**  
ONE GREAT GEORGE STREET,  
LONDON

Optimising the AD industry to reduce emissions through the 2020s. With the Brexit negotiations underway and the new Government committed to reducing carbon emissions, the ADBA National Conference will address the key role that anaerobic digestion (AD) can play in meeting the UK's Carbon Budgets.

AD has significant potential to reduce emissions from heat and transport, whilst simultaneously supporting UK farmers and providing a management solution for food waste.

Join us this year to discuss the drivers shaping our industry with politicians, policy makers and business leaders. The Conference, now in its ninth year, will discuss how we can optimise the AD industry to reduce emissions through the 2020s. [READ MORE](#)

**ECO-BIO 2018 — March 4-8, 2018 — Dublin, Ireland**

One of the main challenges of today's society involves the much needed transition from an almost exclusively fossil-based economy to a more sustainable one, in order to counteract and reduce the emissions of greenhouse gases and associated rise in global warming.

ECO-BIO 2018 provides a platform where industries, scientists, NGOs and governments will meet each other to discuss the needs of a biobased economy from an academic, environmental and societal point of

view including:

The latest research and innovation in biobased products and processes

How we embed the biobased economy in society

Encouraging new research partnerships to enable new cascaded biobased value chains

These developments will have a hugely positive impact on sustainability issues and our future economies. It is time to upscale our innovations and turn them into real, practical solutions.

ECO-BIO 2018 will bring together representatives from both academia and industry to highlight progress and recent developments and the necessary steps to make the biobased economy a reality.

Taking place over two and a half days, ECO-BIO 2018 will comprise plenary talks and forum discussions, parallel sessions, posters and an exhibition together with optional company visits.

**Carbon Capture Utilization and Storage Conference — March 19-22, 2018 — Nashville, TN**

The CCUS Conference is designed for U.S. and international leaders, technical experts, researchers, and industry executives in the field of carbon capture, utilization and storage to gather and discuss efforts to decarbonize the energy and industrial sectors.

Carbon capture and storage (CCS) technologies have the potential to secure up to 90% of CO<sub>2</sub> emissions, however this technology is just reaching maturity. This Conference brings together carbon capture and GHG reduction technology

decision-makers, scientists, and government officials to network, get high-level strategic update, hear case studies on emerging technologies and connect on research in the industry to advance this important technology.

Session topics include:

- Carbon Capture Policy
- Major CCUS Projects
- CCS as a Bipartisan Issue
- CCS from a Global Perspective

Technical sessions include capture, utilization, storage, storage-monitoring and policy. Poster sessions are also presented on the exhibit floor of the ELECTRIC POWERConference + Exhibition. For the second year, CCUS will be co-locating with ELECTRIC POWER Conference + Exhibition. [READ MORE](#)

### ***International Biomass Conference & Expo — April 16-18, 2017 — Atlanta, GA***

INTERNATIONAL  
**BIOMASS**  
CONFERENCE & EXPO  
**April 16-18, 2018**  
**Cobb Galleria Centre**  
**Atlanta, GA**

International Biomass Conference & Expo is where future and existing producers of biobased power, fuels and thermal energy products go to network with waste generators and other industry suppliers and technology providers. It's where project developers converse with utility executives; where researchers and technology developers rub elbows with venture capitalists; and where Fortune 500 executives and influential policy makers sit side-by-side with American farmers and foresters.

Organized by BBI International and produced by Biomass Magazine, this event brings current and future producers of bioenergy and biobased products together with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and policy makers. International Biomass Conference & Expo is the largest, fastest-growing event of its kind. In 2018, this event is expected to draw nearly 1,200 attendees. In 2017, the event drew more than 1,000 attendees, doubling the attendance of the inaugural show. This growth is fueled by a world-class Expo and an acclaimed program. [READ MORE](#)

**Fuel Ethanol Workshop (FEW) — June 11-13, 2018 — Omaha, NE**

Now in its 34th year, the FEW provides the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW is the largest, longest running ethanol conference in the world—and the only event powered by Ethanol Producer Magazine.

From its inception, the mission of the event has remained constant: The FEW delivers timely presentations with a strong focus on commercial-scale ethanol production – from quality control and yield maximization to regulatory compliance and fiscal management. The FEW is also the ethanol industry's premier forum for unveiling new technologies and research findings. The program extensively covers cellulosic ethanol while remaining committed to optimizing existing grain ethanol operations.
