Anaerobic Digestion and Bioresources Association Conference — December 7, 2017 — London, UK

Optimising the AD industry to reduce emissions through the 2020s. With the Brexit negotiations underway and the new Government committed to reducing carbon emissions, the ADBA National Conference will address the key role that anaerobic digestion (AD) can play in meeting the UK's Carbon Budgets.

AD has significant potential to reduce emissions from heat and transport, whilst simultaneously supporting UK farmers and providing a management solution for food waste.

Join us this year to discuss the drivers shaping our industry with politicians, policy makers and business leaders. The Conference, now in its ninth year, will discuss how we can optimise the AD industry to reduce emissions through the 2020s. [READ MORE](#)

ECO-BIO 2018 — March 4-8, 2018 — Dublin, Ireland

One of the main challenges of today’s society involves the much needed transition from an almost exclusively fossil-based economy to a more sustainable one, in order to counteract and reduce the emissions of greenhouse gases and associated rise in global warming.

ECO-BIO 2018 provides a platform where industries, scientists, NGOs and governments will meet each other to discuss the needs of a biobased economy from an academic, environmental and societal point of

view including:

The latest research and innovation in biobased products and processes
How we embed the biobased economy in society
Encouraging new research partnerships to enable new cascaded biobased value chains
These developments will have a hugely positive impact on sustainability issues and our future economies. It is time to upscale our innovations and turn them into real, practical solutions.

ECO-BIO 2018 will bring together representatives from both academia and industry to highlight

progress and recent developments and the necessary steps to make the biobased economy a reality.

Taking place over two and a half days, ECO-BIO 2018 will comprise plenary talks and forum discussions, parallel sessions, posters and an exhibition together with optional company visits.

6th Conference on Carbon Dioxide as Feedstock for Fuels, Chemistry and Polymers — March 15-16, 2018 — Cologne, Germany

15 – 16 March 2018
Cologne (Germany)

www.co2-chemistry.eu

Meet leading international experts at one of the leading events on Carbon Capture and Utilization (CCU) in the world! Big visions – and also real potential! The usage of carbon dioxide, among experts referred to as Carbon Capture & Utilization (CCU), is gaining momentum.

First commercial production of CO₂-based polymers has been launched, several additional technologies have progressed so far to allow production on an industrial scale in the near future – with advanced biotechnology and chemical catalysis. At the same time are renewable energy from solar, wind and hydro becoming cheaper each year and the latest plants at favourable locations are already at the same price level as fossil energy sources and even below. A perfect situation for combining cheap and abundant renewables with carbon utilization to store energy, to produce renewable fuels and chemicals.

Renewable energy and CCU will reshape the energy system of the future and the chemical industry, too. Join the revolution, visit the conference, meet the leading entrepreneurs of the new industry.

Leading players will showcase enhanced and new applications using CO₂ as feedstock. The conference will have four main themes; Policy & Visions, Artificial Photosynthesis & H₂ Generation, Chemicals & Polymers and CO₂-based Fuels and features a mix of keynote, oral and poster presentations.

Carbon Capture Utilization and Storage Conference — March 19-22, 2018 — Nashville, TN

The CCUS Conference is designed for U.S. and international leaders, technical experts, researchers, and industry executives in the field of carbon capture, utilization and storage to gather and discuss efforts to decarbonize the energy and industrial sectors.

Carbon capture and storage (CCS) technologies have the potential to secure up to 90% of CO₂ emissions, however this technology is just reaching maturity. This Conference brings together carbon capture and GHG reduction technology decision-

makers, scientists, and government officials to network, get high-level strategic update, hear case studies on emerging technologies and connect on research in the industry to advance this important technology.

Session topics include:

- Carbon Capture Policy
- Major CCUS Projects
- CCS as a Bipartisan Issue
- CCS from a Global Perspective

Technical sessions include capture, utilization, storage, storage-monitoring and policy. Poster sessions are also presented on the exhibit floor of the ELECTRIC POWER Conference + Exhibition. For the second year, CCUS will be co-locating with ELECTRIC POWER Conference + Exhibition. [READ MORE](#) Register with this link and Use Code ABUSA for discount.

International Biomass Conference & Expo — April 16-18, 2017 — Atlanta, GA

INTERNATIONAL
BIOMASS
CONFERENCE & EXPO
April 16-18, 2018
Cobb Galleria Centre
Atlanta, GA

International Biomass Conference & Expo is where future and existing producers of biobased power, fuels and thermal energy products go to network with waste generators and other industry suppliers and technology providers. It's where project developers converse with utility executives; where researchers and technology developers rub elbows with venture capitalists; and where Fortune 500 executives and influential policy makers sit side-by-side with American farmers and foresters.

Organized by BBI International and produced by Biomass Magazine, this event brings current and future producers of bioenergy and biobased products together with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment

manufacturers, project developers, investors and policy makers. International Biomass Conference & Expo is the largest, fastest-growing event of its kind. In 2018, this event is expected to draw nearly 1,200 attendees. In 2017, the event drew more than 1,000 attendees, doubling the attendance of the inaugural show. This growth is fueled by a world-class Expo and an acclaimed program. [READ MORE](#)

4th Symposium on Urban Mining and Circular Economy— May 21-23, 2018— Bergamo, Italy

Following the great success of the third edition held in 2016, which saw the participation of almost 300 delegates from a wide variety of countries, SUM 2018 / 4th Symposium on Urban Mining and Circular Economy will be held in the old Monastery of Saint Augustine in Bergamo upper city, in May 2018.

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. This combination is equally important in other fields of waste management, although is of paramount relevance for a Circular Economy. SUM 2018 will focus on all relevant and innovative aspects relating to these three worlds. The Symposium will last three days and will include oral sessions,

a poster session and a technical tour. [READ MORE](#)

Fuel Ethanol Workshop (FEW) — June 11-13, 2018 — Omaha, NE

Now in its 34th year, the FEW provides the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW is the largest, longest running ethanol conference in the world—and the only event powered by Ethanol Producer Magazine.

From its inception, the mission of the event has remained constant: The FEW delivers timely presentations with a strong focus on commercial-scale ethanol production – from quality control and yield maximization to regulatory compliance and fiscal management. The FEW is also the ethanol industry's premier forum for unveiling new technologies and research findings. The program extensively covers cellulosic ethanol while remaining committed to optimizing existing grain ethanol operations. [READ MORE](#)

10th PALMEX Indonesia 2018 — October 9-11, 2018 — North Sumatera, Medan, Indonesia

The 10th PALMEX Indonesia 2018 is the only specialized Palm Oil event in Asia that brings together an international congregation of both upstream and downstream palm oil companies and also its supporting industries gathered in the capital city of North Sumatera, Medan to showcase the latest developments in the palm oil industry.

North Sumatera, home to one of Indonesia's largest concentration of oil palm plantations and

also the presence of many supporting facilities such as palm oil processing plants making its capital Medan the perfect venue for the show. This unique event seeks to educate the public on the importance of the palm oil industry in Indonesia and the future trends of palm oil in the region. More than 7,000 industry professionals from more than 10 countries would be expected to turn up at this event. The international character and regional audience of PALMEX Indonesia 2018 provides unparalleled marketing, education and networking opportunities. [READ MORE](#)

VENICE2018 – 7th International Symposium on Energy from Biomass and Waste — October 15-18, 2018 — Venice, Italy

The production of energy from alternative sources and its impact on climate change are among the main strategic tools implicated in the sustainable development of our society. Numerous types of biomass and wastes contribute towards the production of energy and reduction in the use of fossil fuels by means of biological, chemical and thermal processes. Existing biomass and waste to energy technologies are currently undergoing rapid development. Despite growing interest in the use of these technologies, in many countries their implementation remains limited.

The aim of the Venice 2018 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2016, was attended by over 500 scientists and operators from approximately 57 different countries.

The seventh edition of the Symposium will feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies working in the field
- Expected attendance of over 600 delegates from tens of different countries worldwide [READ MORE](#)
