Revolution in Food and Biomass Production (REFAB) — October 1-2, 2018 — Cologne, Germany

friendly products?

The conference will bring together future-oriented experts from companies, start-ups and research to have a look at the future of food and biomass production. What high-tech strategies are emerging on the horizon to sustainably supply a growing world population with healthy food – and at the same time provide industry with sustainable biomass for environmentally

The conference gives a unique opportunity to meet the pioneers and forerunners of the future of food and biomass production. Don't miss the revolution, be part of it.

The two-day conference will feature about 50 presentations, more than 500 participants (mainly from industry) and 30 exhibitors are expected. Find the

preliminary programme at www.refab.info/programme www.refab.info/registration

Thermal & Catalytic Sciences Symposium (TCS) 2018 – October 8-10, 2018 — Auburn University, Alabama

Auburn University is hosting the 2018 edition of the Thermal and Catalytic Sciences Symposium, October 8 – 10, 2018. Called TCS 2018, the event focuses on thermochemical biomass research and development and providing early career scientists and engineers an opportunity to present their research and interact with the senior researchers in the community.

Iowa State University's Bioeconomy Institute (BEI) held the first installment of the symposium in 2010 and co-hosted the event in 2014 with the National Renewable Energy Laboratory. RTI International hosted the event in 2016.

Topics to be covered at the symposium include biomass gasification and gas clean up, biomass gas to liquid, pyrolysis and upgrading, solvent liquefaction, and sugars via thermal deconstruction of cellulosic biomass. Other areas to be addressed are co-products upgrading and utilization, lignin utilization, biomass preprocessing and pretreatment, and technoeconomic analysis, life cycle analysis and policy analysis.

The Thermal and Catalytic Sciences Symposium has been held every other year following the first symposium held in 2010 at Iowa State University with the goal of focusing on thermochemical biomass research and development and providing early career scientists and engineers an opportunity to present their research and interact with the senior researchers in the community. VENICE2018 – 7th International Symposium on Energy from Biomass and Waste — October 15-18, 2018 — Venice, Italy

The production of energy from alternative sources and its impact on climate change are among the main strategic tools implicated in the sustainable development of our society. Numerous types of biomass and wastes contribute towards the production of energy and reduction in the use of fossil fuels by means of biological, chemical and thermal processes. Existing biomass and waste to energy technologies are currently undergoing rapid development. Despite growing interest in the use of these technologies, in many countries their implementation remains limited.

The aim of the Venice 2018 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2016, was attended by over 500 scientists and operators from approximately 57 different countries.

The seventh edition of the Symposium will feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies working in the field

- Expected attendance of over 600 delegates from tens of different countries worldwide [READ MORE](#)
