***Fuels of the Future 2022 – Navigator for Sustainable Mobility! —
January 24-28 2022 — ONLINE***

www.fuels-of-the-future.com

**19th International Conference
on Renewable Mobility**

24/25 January 2022

The international specialist congress “Fuels of the Future” is the leading event of the European biofuel industry and at the same time an important discussion forum for the German, European and international development of renewable mobility. Fuels of the Future 2022 welcomes national and international participants, including representatives from raw material collection and processing, the biofuel, mineral oil and motor vehicle industries, the chemical industry, the transport and logistics sector, certification systems and from politics, science and research.

The aim of the international specialist congress is to provide the participants with the latest information on the various legislative initiatives and to discuss appropriate recommendations for action, to present current market developments and project examples of renewable mobility, and to offer a broad space for the exchange of experiences.

As usual, the event will be held in two languages (German-English). [READ MORE](#)

ANOTHER NEW DATE 13th Biofuels International Conference & Expo -- Change to March 15-16, 2022 -- Brussels, Belgium

The 13th Biofuels International Conference & Expo will bring together leading producers, suppliers, regulators and other engaged organisations over a two-day period. High-level speakers, experts in their field, will address a range of topical issues relating to the biofuels sector. Brought to you by Biofuels International, the leading international biofuels magazine, this year's conference will be held in Brussels, Belgium and **co-located with the International Biogas Congress & Expo as well as the renowned Biomass Congress & Expo**, making this series of bio events our largest gathering yet of bio related companies, giving participants unrivalled coverage. [READ MORE](#)

ANOTHER NEW DATE International Biogas Congress & Expo — Change to March 15-16, 2022 — Brussels, Belgium

The International Biogas Congress & Expo brings together leading producers, suppliers, regulators and other engaged organisations over a two-day period. High-level speakers, experts in their field, will address a range of topical issues relating to the biogas sector.

Brought to you by Bioenergy Insight, the leading international biogas magazine, this year's conference will be held in Brussels, Belgium and co-located with the International Biomass Congress & Expo as well as the renowned Biofuels International Conference and Expo, making this series of bio events our largest gathering yet of bio related companies, giving participants unrivalled coverage. [READ MORE](#)

***ANOTHER NEW DATE International Biomass Congress & Expo —
Change to March 15-16, 2022 — Brussels, Belgium***

The logo for the International Biomass Congress & Expo features a small green leaf icon to the left of the text. The text is arranged in three lines: "international Biomass" in a sans-serif font, "CONGRESS & EXPO" in a bold, all-caps sans-serif font, and "BRUSSELS | 19-20 OCTOBER 2021" in a smaller, all-caps sans-serif font below a thin horizontal line.

BRUSSELS | 19-20 OCTOBER 2021
Bringing biomass markets closer

The International Biomass Congress & Expo aims to bring together leading producers, suppliers, regulators and other engaged organisations over a two day period. High-level speakers, experts in their field, will address a range of topical issues relating to the biomass sector.

Brought to you by Bioenergy Insight, the leading international biomass magazine, this year's conference will be held in Brussels, Belgium and co-located with the International [Biogas Congress & Expo](#) as well as the renowned [Biofuels International Conference and Expo](#), making this series of bio events our largest gathering yet of bio related companies, giving participants unrivalled coverage. ABLC 2022 — March 16-18, 2022 — Washington, DC

The logo for Biofuels Digest features the word "Biofuels" in a large, bold, green serif font, with the word "Digest" in a smaller, bold, orange serif font directly below it.

ABLC is a connected series of 7 conferences and events in total on the most important issues in the Circular Bioeconomy right now. These conferences-within-a-conference are: The Advanced Biofuels Summit, The Renewable Chemicals & Biomaterials Summit, The Green Hydrogen Summit, The Advanced Agriculture Summit , The Sustainable Aviation Summit, and The Biogas & RNG Summit and the Circular Bioeconomy Policy Forum In addition to the 7 conferences, there will be 7 special events, forums and workshops: The Investor & Finance Workshop on capital trends; The Industry Horizons Forum;

The ABLC Due Diligence Wolfpack; The Bio-LPG Challenge, The annual State of the Industry address ABLC Network Like Crazy sessions throughout the event for introductions and meet-ups; and, the ABLC Keynotes. [READ MORE](#)

Conference on CO₂-based Fuels and Chemicals — March 23-24, 2022 — hybrid event – ONLINE and Cologne, Germany

The conference is one of the most established worldwide and has developed into a unique meeting and networking place for the entire Carbon Capture & Utilisation (CCU) and Power-to-X industry and its customers. The first day will focus on green hydrogen production, carbon capture and CO₂-based transport and aviation fuels, the second especially on CO₂-based bulk and fine chemicals. CCU technologies are essential to meet the future demand for carbon from renewable sources. Take a look into the near future and exchange ideas with the leading pioneers.

CCU is one essential pillar for the supply of renewable carbon besides biomass and recycling. The transition to direct CO₂ utilisation as one alternative carbon source is needed to substitute fossil feedstock sources, to fight climate change and to shift towards sustainable and climate-friendly production and consumption. For providing the full benefits of CCU technologies the use of renewable energy is indispensable. Especially the supply of renewable energy and green hydrogen is crucial for the production of CO₂-based transportation and aviation fuels, bulk and fine chemicals.

New and leading players will showcase novel and improved applications based on the use of CO₂ as feedstock. Main topics of the conference are green

hydrogen production, carbon capture technologies and carbon utilisation (Power-to-X): Transportation and aviation fuels, building-blocks, bulk and fine chemicals as well as advanced technologies for CO₂ utilisation such as artificial photosynthesis. [READ MORE](#)

The North American Carbon Dioxide Utilization Summit — April 27-28, 2022 — Montreal, Quebec, Canada

ACI's North American Carbon Dioxide Utilization Summit will follow on from our successful 13th edition which took place in Calgary focusing on the re-use of greenhouse gas CO₂ and converting this into profitable sustainable and commercial materials. It will be taking place in Montreal, Canada on the 27th and 28th of April 2022.

The two day event will bring together senior experts from various CO₂ emitting industries discussing sustainable, technological and commercial aspects of CO₂ Utilization in Canada and across the globe. With technology comparisons focusing on economic, environmental, and social indicators, our panel of speakers will highlight knowledgeable insights into commercial application and development of technology and products.

Last year the focus was on the path to commercialization of CO₂ capture, utilization and storage technologies. This year there will still be focuses on this, as it is important for start-ups to know. However, there will also be more case studies on already commercialized and successful utilization technologies and the uses for them. [READ MORE](#)

Oleofuels 2022 — May 18-19, 2022 — Marseille, France

ACI's Oleofuels 2022 will take place on the 18th and 19th May 2022, in Marseille, France. The European HVO market has seen substantial growth over the last 5 years, with more and more oil majors, such as Neste, Total, ENI and dedicated fuels producers alike continuing to invest heavily in HVO production units. With the continued focus on reducing GHG and CO2 emissions both in Europe, and across the globe, the demand for more sustainable fuels has never been higher. However with increasing competition from Asia and the US, the need for sustainable feedstocks, increasing regulatory pressures, price fluctuation, the need for more investment in R&D and adaptation to new technologies shows that the industry is still facing some significant challenges.

Already on its 13th edition of a very successful series, Oleofuels 2022 will bring together senior representatives from the biodiesel, renewable diesel and HVO industries to discuss the latest market advancements, developments & business opportunities. [READ MORE](#)

6th Symposium on Circular Economy and Urban Mining — May 18-20, 2022 — Capri, Italy

Saving and recovery of resources and increasing need of environmental sustainability have been the driving forces for the development of Circular Economy and Urban Mining strategies. These represent a real revolution in waste management as well in several other fields. In order to optimise them a scientific approach is necessary, involving all the different disciplines (Engineering, Economy, Chemistry, etc.), all possible stakeholders (industries, researchers, waste management companies, citizens, decision makers, administrators, regulators, politicians, etc.) and considering all the implementation aspects including the most critical ones such as quality of recycled products, sustainable management of residues, symbiosis between producers and recyclers, stability of markets, end of waste regulations, role of final sinks, etc.

The SUM Symposium, organised biennially by [IWWG – International Waste Working Group](#) since 2012, has grown up very well representing the ideal reference Forum for Circular Economy and Urban mining, where scientists and stakeholders can debate most advanced results and focus on future needs.

In order to widen participation and to favour networking, the 2022 edition of the Symposium (10th Anniversary) will be held in the fascinating [venue](#) of Capri, Italy and will last three days from 18th to 20th May 2022. [READ MORE](#)

Carbon Capture & Storage Summit — June 13, 2022 — Minneapolis, MN

Capturing and storing carbon dioxide in underground wells has the potential to become the most consequential technological deployment in the history of the broader biofuels industry. Deploying effective carbon capture and storage at biofuels plants will cement ethanol and biodiesel as the lowest carbon liquid fuels commercially available in the marketplace. The Carbon Capture & Storage Summit will offer attendees a comprehensive look at the economics of carbon capture and storage, the infrastructure required to make it possible and the financial and marketplace impacts to participating producers.

Presentation topics will include:

- Tax Policy
- Impact on Carbon Intensity of Fuel
- Required Plant Infrastructure
- Environmental Permitting
- Pipeline Requirements and Construction
- Low Carbon Fuel Markets and Mandates [READ MORE](#)

Biodiesel and Renewable Diesel Summit — June 13-15, 2022 — Minneapolis, MN

The Biodiesel & Renewable Diesel Summit is a forum designed for biodiesel and renewable diesel producers to learn about cutting-edge process technologies, new techniques and equipment to optimize existing production, and efficiencies to save money while increasing throughput and fuel quality.

Produced by Biodiesel Magazine, this world-class event features premium content from technology providers, equipment vendors, consultants, engineers and producers to advance discussion and foster an environment of collaboration and networking through engaging presentations, fruitful discussion and compelling exhibitions with one purpose, to further the biomass-based diesel sector beyond its current limitations. [READ MORE](#)

Fuel Ethanol Expo & Workshop (FEW) — June 13-15, 2022 — Minneapolis, MN

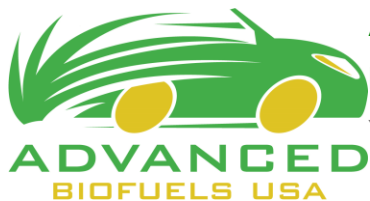

Now in its 37th year, the FEW provides the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW is the largest, longest running ethanol conference in the world—and the only event powered by Ethanol Producer Magazine. From its inception, the mission of the event has remained constant: The FEW delivers timely presentations with a strong focus on commercial-scale ethanol production – from quality control and yield maximization to regulatory compliance and fiscal management. The FEW is also the ethanol industry’s premier forum for unveiling new technologies and research findings. The program extensively covers cellulosic ethanol while remaining committed to optimizing existing grain ethanol operations. [READ MORE](#)

Advanced Biofuels USA, a nonprofit educational organization, advocates for the adoption of renewable fuels as the immediate solution to reduce greenhouse gas emissions.

Advanced Biofuels USA Presentations: Improve Understanding of Biofuels

Attention Educators, Community and Student

Leaders: Looking for PowerPoint slides to use in YOUR presentations? [Click here.](#)

INTERESTED IN A SINGLE-SESSION PRESENTATION or series of webinars for your class, civic organization, club, employees or group of friends by an Advanced Biofuels USA expert?

Contact Joanne Ivancic at 301-644-1395 or info@AdvancedBiofuelsUSA.org
Multi-session seminars also available.

We could use your help!
Please DONATE!

Advanced Biofuels USA relies on Individual Contributions, Corporate Donations, In-Kind Donations and the Work of Many Volunteers to enable this organization to promote the understanding, development and use of advanced biofuels and to inspire action.

You can now make a secure donation to Advanced Biofuels USA via PayPal by clicking on the "[Donate](#)" button above. It's quick, easy and safe. Make it a year-long gift by making monthly installments automatically.

You can make your gift in memory or in honor of someone special. Just let us know. Call (301-644-1395) or send an email: info@AdvancedBiofuelsUSA.org. We'll send a special card acknowledging your gift.

Don't let this opportunity slip away! [DONATE](#) Now! Use the buttons and links or mail your donation to Advanced Biofuels USA, 507 North Bentz Street, Frederick, MD 21701. Thank you for your support.

You have received this newsletter because you indicated to us an interest in Advanced Biofuels USA. We hope you find it useful. If you want to stop receiving these monthly newsletters, just follow the instructions below.
