Green Bay Packaging Honored with Biorenewable Deployment Consortium's Outstanding Innovation Award

Little Rock, Arkansas, November 15, 2022—The Biorenewable Deployment Consortium (BDC) honored Green Bay Packaging with the 2022 Outstanding Innovation Award for their culture of innovation through partnerships.

“BDC is proud to honor Green Bay Packaging with its Outstanding Innovation Award,” said BDC President and Co-Founder, Masood Akhtar. “Green Bay Packaging is a great example of a company that has developed a rich culture of innovation and is willing to be first in the deployment of new processes that will add value to operations and make the company more competitive and sustainable.”

“It is an honor for us to be recognized by BDC. This award is special to us because we strive for a culture of innovation through partnerships focusing on creating inventive and economical solutions for our customers. We accept this award on behalf of our team who is dedicated to making Green Bay Packaging a leader in innovation,” said Matthew Szymanski, Vice President of Mill Operations, who received the award on behalf of Green Bay Packaging.

About Biorenewable Deployment Consortium LLC

BDC assists with the deployment of leading-edge advanced biofuels, biochemicals, and bioproducts technologies that do not require any long-term subsidy making them more profitable and sustainable. Since its inception in 2006, BDC has been established as an unbiased and trustworthy international company for the forest products industry, chemical industry, service and technology providers, government, and academic institutions. BDC conducts unbiased due diligence, identifies end-users and off-takers, technology and service providers, and funding providers under its brokering partnership initiative. BDC provides webinars, writes articles, and holds an annual forum, which includes a tour of a pilot, demo, or commercial facility, all while providing networking opportunities. For more information, visit BDC at www.biorenewabledc.com.

About Green Bay Packaging

Established in 1933, Green Bay Packaging Inc. is a family-owned, vertically integrated manufacturing company consisting of corrugated container plants, a folding carton facility, recycled and virgin linerboard mills, pressure-sensitive label roll stock plants, specialty converting operations, timberlands, and a sawmill facility. Headquartered in Green Bay, Wis., Green Bay Packaging is dedicated to the innovative development of its products and forestry resources, with a focus on safety, sustainability, quality, and continuous improvement throughout all 38 facilities in 16 states.
