Recent Activities, Articles

[Read the latest by Advanced Biofuels USA correspondents here.](#)

Anyone working or investing in biofuels knows it isn't easy. From time to time, Advanced Biofuels USA publishes stories about the experiences of people working diligently to move the world toward truly renewable sustainable transportation fuels.

Although unique, these stories also reflect the experiences and purpose of many in the biofuels

world who, not content to just talk, dedicate themselves to action to improve the condition of the Earth as best they can. This month, Reciclaje Pura Vida's Larry Knight shares his adventures with a focus on Costa Rica toward an optimistic conclusion.

Global Survival at a Crossroads

Larry Knight, a biodiesel entrepreneur in Costa Rica, agreed to share his story with Advanced Biofuels USA, including the ups, downs, the optimism, pessimism, lessons learned, idealism and perseverance.

As he tells it:

... At the professional level, most of my adult life has been marked by entrepreneurial pursuits - some successful, and some not, in small businesses that included hot air balloons, restaurant/bar, home healthcare companies, printing/publishing/graphic design, and various sales and contracting efforts. In

2008, the economic bottom fell out, and after 30 years of chasing the ever-elusive dollar, I had had enough. With one company sold and the other shut down, I returned to college ...

It sure seemed like a good idea at the time. The original team consisted of myself and three other investors who would provide operational assistance. As it was a small project, I didn't formalize too much of that effort, leaving me open to problems.

The first one involved moving forward on the project without the other partners' money in the bank. After committing to the purchase, investors and investment money disappeared, leaving me holding the bag on most of the purchase. The project, with full funding in place from all players, was marginally capitalized to begin with, so this unanticipated development didn't help the situation in any favorable direction. I will leave the resulting avalanche of financial problems, which persist to this day, to the reader's imagination. Suffice it to say, the problems started with day one. [READ MORE](#)

Advanced Biofuels USA Education and Outreach Activities in India: A Report

Prof (Dr.) Gunjan Mukherjee has been working on Education and Outreach for Advanced Biofuels USA, as Professor of Biotechnology at Chandigarh University. Recently, he conducted a few lectures where the activities of Advanced Biofuels USA were presented and discussed with senior faculty members and students.

**CHANDIGARH
UNIVERSITY**
Discover. Learn. Empower.

Discussions on the future of biofuels and the role of Advanced Biofuels USA also took place during the

International Conference (International Conference on Microbial Biotechnology MICROCON 2017, organized by Department of Microbial Biotechnology, P L Anand Auditorium, February 16-17, 2017) with senior Professor, Dr Rupinder Tewari, Department of Microbial Biotechnology, Panjab University, India. During National Symposium (February 16, 2017) on Microbial Approaches for Industrial Processes and Therapeutics (Organized by Department of Microbiology, Panjab University, India) the role of Advanced Biofuels USA was also discussed.

He reported that the response to the lectures was very impressive. The audience, mainly the students, showed their interest in biofuel and asked many questions. Highlights of few questions:

- The role of Advanced Biofuels USA in the biofuel sector.
- What is the future of biofuel in India?
- The policies of biofuels in India were also discussed. In India still today gasoline is not replaced or partially mixed with bioethanol for transport fuel. [READ MORE](#)

***10th Biofuels International Conference and Expo — October 4-5, 2017 —
Edinburgh, Scotland***

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services. Keystone Farm Show — January 9-11, 2018 — York, PA

***The Largest Commercial
Farm Equipment &
Service Provider Trade
Show in The State of
Pennsylvania!!***

The Keystone Farm Show is the fastest growing farm show on the East Coast! Started in January of 1998 to address the needs of agrimarketers in the Mid-Atlantic area, the show has nearly tripled in size! The Keystone Farm Show has been extended to 3 days to accommodate the increase in attendance. This show targets only full-time farmers in Pennsylvania, New Jersey, Maryland, and Northern Virginia. Since its inception, the Keystone Farm Show has tripled in number of exhibitors and uses all available space at the York Fairgrounds including the newly refurbished

Heritage Hall. This show is only marketed to full-time farmers through the agricultural print media in the geographical area covered by Country Folks weekly farm newspapers.
