Small Scale, Self-Contained–Key Concepts at EnergyPath 2017

Joanne Ivancic and Pandey Rockwell staffed a busy information table at **EnergyPath 2017** at DeSales University near Allentown, PA. With more than 100 scholarships to Energy Camp participants and up to \$1250 top prizes for both the high school and middle school science fair, this annual event has reached into the real lives of everyday people for 20 years.

With a special continuous slide show and an example of an [energy beet](#) grown in 2016 at the University of Maryland Eastern Shore, they talked about not only advanced biofuels in general, but the efforts of the UMES project to make it possible for owners of small farms to participate in the bioeconomy via the energy beet-to-jetfuel project proposed for that area.

A number of teachers stopped by to gather information and resource materials for classes. About 80% of the constant stream of visitors to the table wanted to talk about how small amounts of personal or business waste could be used more efficiently for heat/power or transportation energy.

As a symposium speaker, Ivancic provided a quick overview of advanced biofuels from feedstock to fuels for heat/power and cooking, as well as transportation, followed by an update on the feasibility study of the UMES energy beet-to-jetfuel project that Advanced Biofuels USA is coordinating. Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us!

Visit with Michael Eggleston in October at EFIB, European Forum for Industrial Biotechnology & the Bioeconomy 2017 and at the Global Sustainable Aviation Summit.

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy and **Michael Eggleston**, one of our newest volunteers, will be covering this event for us during his year of study in the EU as he takes a break from research on bio-based batteries and expands his understanding of bio-based fuels, chemicals and products.

Let him know what you are up to these days and watch for his article about the conference in a coming newsletter. [READ MORE](#) And see below for discount

information.

Michael Eggleston will also be covering the Global Sustainable Aviation Summit, hosted by ATAG and co-organised by ACI, IATA, CANSO and ICCAIA in

Geneva, Switzerland October 3-4.

Visit our Exhibit at the Keystone Farm Show from January 9-11, 2018 in York, PA

Thanks to the generosity of Lee Publications, **Peggy Alpert**, **Bob Kozak** and **Joanne Ivancic** will again staff the Advanced Biofuels USA exhibit at the "Farm Show for Farmers" in York, PA.

Always an opportunity to learn as much as we teach, we look forward to seeing you at the farm show. For free admission ticket as our guest, email your request to info@advancedbiofuelsUSA.org [READ MORE](#)

North Sumatera, home to one of Indonesia's largest concentration of oil palm plantations and also the presence of many supporting facilities such as palm oil

processing plants making its capital Medan the perfect venue for the show. This unique event seeks to educate the public on the importance of the palm oil industry in Indonesia and the future trends of palm oil in the region. More than 7,000 industry professionals from more than 10 countries would be expected to turn up at this event. [READ MORE](#)

***10th Biofuels International Conference and Expo — October 4-5, 2017 —
Edinburgh, Scotland***

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services. ***European Forum for Industrial Biotechnology & the Bioeconomy (EFIB) 2017
— October 9-11, 2017 — Brussels, Belgium***

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy.

Industrial Biotechnology is currently worth €23 billion representing just 6% in sales of the overall worldwide chemicals market. However, it is significantly out-performing the overall chemicals market at an impressive 20% annual growth rate and has the potential to become the dominant technology of tomorrow's chemicals industry, representing a huge future opportunity.

Delivering on this opportunity will require significant investment, innovation and value chain development and most importantly new collaborations across the sector. Additionally we are

faced with important challenges posed by high energy prices, the impact of the shale gas boom on the development of biobased chemicals markets and the ongoing need for predictable, coherent and supportive policy in the EU.

In order to understand and overcome these challenges and prosper in the industrial biotechnology market, industry experts throughout the vibrant and innovative biobased community come together to one central location every year to discuss the key issues and gain a snapshot of the most significant developments on scale up of commercial biorefineries around the world.

That location is the European Forum for Industrial Biotechnology & the Bioeconomy (EFIB), where delegates are provided with an update on the status and outlook of biobased industries. EFIB is proud to foster engagement between policy makers, a broad range of stakeholders connected with the existing biobased value chain and seeks to reach out to, and include, new interlocutors. ABLC NEXT 2017 — October 16-18, 2017 — San Francisco, CA

At ABLC NEXT, you'll meet application and platform developers, investors, policymakers, end-use customers and channel & development partners for the newest technologies of the advanced bioeconomy: health, nutrition, AgTech, genetics, big data, robotics, fuels, chemicals and materials. This is the place where digital and physical technologies converge.

ABLC NEXT is a connected series of 5 conferences on the most important issues in the Bioeconomy right now. These conferences-within-a-conference are: 1. The Advanced Fuels Summit - focused this year on Advanced Biomass Diesel, BioCrude, Advanced Alcohols and Alternatives to gasoline. 2. The Renewable Chemicals & Biomaterials Summit - focused this year on Novel Performance Chemicals and Advanced Packaging. 3. The Sustainable Brands Summit - the technologies deployed by major brands — and their deployment, communications and performance goals. 4. The Advanced Nutrition Summit - advanced products and technologies for human and animal nutrition — more food, better food, and more customer choice. 5. The BioFrontiers Summit - the 30 Most Compelling technologies and solutions ready for development and commercialization from leading technology developers and labs. [READ MORE](#)
