Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us!

Joanne Ivancic Will Staff Booth at 4th Annual Clean Energy and Sustainability Extravaganza on February 23, 2018 at University of Maryland College Park

The theme this year is Cleantech Innovation & Entrepreneurship, sponsored by the Association of Energy Engineers – National Capital Chapter (AEE NCC), Association of Energy Engineers – Baltimore Chapter (AEE-Baltimore), and Leaders in Energy along with the University of Maryland (UMD).

The Extravaganza has three components:

- AEE NCC and AEE-Baltimore Council on Women in Energy and Environmental Leadership (CWEEL) Luncheon Panel on “Career Perspectives in CleanTech from Women Leaders” (11:00 am – 1:45 pm).
- Leaders in Energy CleanTech Innovation and Entrepreneurship Showcase (2:30 – 5:30 pm) Come see us. **Joanne Ivancic** will staff a booth.
- Leaders in Energy Reception (6:00 – 8:00 pm).

This event, held at a university each year, provides a unique opportunity for students and faculty to connect with professionals in the clean energy and sustainability community, including the sponsors, CleanTech businesses, and others. Students and jobseekers who are interested in the green tech and services field will have the opportunity to engage with others who are working in this area. [READ MORE](#)

Dr. Gunjan Mukherjee Will Represent Advanced Biofuels USA at the International Conference on Sustainable Biofuels, February 26-27, 2018 in New Delhi, India

Visit with **Dr. Gunjan Mukherjee** and discuss developments in advanced biofuels at this event, jointly organised by Department of Biotechnology, Ministry of Science and Technology, India & Mission Innovation – India along with Biofuture Platform.

CONFERENCE AIMS

- Provide a platform to Government policy makers, investors, industry and research community to exchange experiences and challenges related to development and scaling up of advanced biofuels.

- Exchange best practices in developing projects, performance breakthroughs and in cost reduction.
 - Understanding the concerns of private sector and that of investors, to speedup large scale production of sustainable biofuels. [READ MORE](#)

4th Annual Clean Energy and Sustainability Extravaganza – February 23, 2018 — College Park, Maryland

Energy and Sustainability Extravaganza at University of Maryland, Friday, February 23rd, 11 am – 8 pm

Join us for our Fourth annual “Council on Women in Energy and Environmental Leadership and Clean Energy and Sustainability Extravaganza,” February 23rd at the University of Maryland – College Park.

Our partner will be the Association of Energy Engineers – National Capital Chapter.

Our theme this year is Cleantech Innovation & Entrepreneurship.

The Association of Energy Engineers – National Capital Chapter (AEE NCC), Association of Energy Engineers – Baltimore Chapter (AEE-Baltimore), and Leaders in Energy are joining forces with the University of Maryland (UMD) for the 4th annual Clean Energy & Sustainability Extravaganza.

Are you interested in cleantech to advance clean energy and sustainable solutions? Cleantech is an umbrella term referring to clean energy, environmental, and sustainable or green products and services. This event will bring together the university and business communities in cleantech. Participants will learn about

research and ventures from numerous University of Maryland departments and businesses, including start-ups. They will also hear from women leaders in this field who will be providing their perspectives regarding the industry as well as career advice and tips. [READ MORE](#)

Advanced Bioeconomy Leadership Conference (ABLC) — February 28-March 2, 2018 — Washington, DC

The theme of the conference is [“Network Like Crazy”](#) and more than 250 organizations and technologies will be on hand – to build supply chains, value chains, investor support, assess trends, chart policy needs and measure policy support. At ABLC, not only do you meet top company execs, you get the low-down on what’s real.

Policy, finance, partnerships, world class R&D and effective scale-up – all the major companies presented, the opening session with the heads of all the top trade associations, to in-depth updates from the key government agencies, and the special Financing & Investing Workshop: You’ll know what’s working for 2018. You’ll know what’s working for 2019 and beyond.

ABLC Next will feature five distinct conference experiences:

1. The Advanced Biofuels Summit
2. The Renewable Chemicals & Biomaterials Summit
3. The ABLC Crops & Feedstocks Summit
4. The Sustainable Aviation Fuels Summi
5. The Development & Deployment Showcase [READ MORE](#)

ECO-BIO 2018 — March 4-8, 2018 — Dublin, Ireland

One of the main challenges of today's society involves the much needed transition from an almost exclusively fossil-based economy to a more sustainable one, in order to counteract and reduce the emissions of greenhouse gases and associated rise in global warming.

ECO-BIO 2018 provides a platform where industries, scientists, NGOs and governments will meet each other to discuss the needs of a biobased economy from an academic, environmental and societal point of view including:

The latest research and innovation in biobased products and processes

How we embed the biobased economy in society

Encouraging new research partnerships to enable new cascaded biobased value chains

These developments will have a hugely positive impact on sustainability issues and our future economies. It is time to upscale our innovations and turn them into real, practical solutions.

ECO-BIO 2018 will bring together representatives from both academia and industry to highlight progress and recent developments and the necessary steps to make the biobased economy a reality.

Taking place over two and a half days, ECO-BIO 2018 will comprise plenary talks and forum discussions, parallel sessions, posters and an exhibition together with optional company visits. [READ MORE](#)

6th Conference on Carbon Dioxide as Feedstock for Fuels, Chemistry and Polymers — March 15-16, 2018 — Cologne, Germany

Meet leading international experts at one of the leading events on Carbon Capture and Utilization (CCU) in the world! Big visions – and also real potential! The usage of carbon dioxide, among experts referred to as Carbon Capture & Utilization (CCU), is gaining momentum.

www.co2-chemistry.eu

First commercial production of CO₂-based polymers has been launched, several additional technologies have progressed so far to allow production on an industrial scale in the near future – with advanced biotechnology and chemical catalysis. At the same time are renewable energy from solar, wind and hydro becoming cheaper each year and the latest plants at favourable locations are already at the same price level as fossil energy sources and even below. A perfect situation for combining cheap and abundant renewables with carbon utilization to store energy, to produce renewable fuels and chemicals.

Renewable energy and CCU will reshape the energy system of the future and the chemical industry, too. Join the revolution, visit the conference, meet the leading entrepreneurs of the new industry.

Leading players will showcase enhanced and new applications using CO₂ as feedstock. The conference will have four main themes; Policy & Visions, Artificial Photosynthesis & H₂ Generation, Chemicals & Polymers and CO₂-based Fuels and features a mix of keynote, oral and poster presentations.

Carbon Capture Utilization and Storage Conference — March 19-22, 2018 — Nashville, TN

The CCUS Conference is designed for U.S. and international leaders, technical experts, researchers, and industry executives in the field of carbon capture, utilization and storage to gather and discuss efforts to decarbonize the energy and industrial sectors.

www.ccusconference.com Carbon capture and storage (CCS) technologies have the potential to secure up to 90% of CO2 emissions, however this technology is just reaching maturity. This Conference brings together carbon capture and GHG reduction technology decision-makers, scientists, and government officials to network, get high-level strategic update, hear case studies on emerging technologies and connect on research in the industry to advance this important technology.

Session topics include:

- Carbon Capture Policy
- Major CCUS Projects
- CCS as a Bipartisan Issue
- CCS from a Global Perspective

Technical sessions include capture, utilization, storage, storage-monitoring and policy. Poster sessions are also presented on the exhibit floor of the ELECTRIC POWERConference + Exhibition. For the second year, CCUS will be co-locating with ELECTRIC POWER Conference + Exhibition. [READ MORE](#) Register with this link and Use Code ABUSA for discount.

World Bio Markets — March 20-22, 2018 — Amsterdam, Netherlands

The conference brings together all levels of the bio-based value chain; including government, feedstock producers, logistics providers, investors, chemicals and fuels producers, and brands and end users.

Bio-fuels producers have faced numerous challenges in recent years, from the low price of oil to the advance of electric vehicles and growing public and regulatory pressure towards more sustainable business practices. Yet there are opportunities on the horizon from second and third generation feedstocks and new markets in long distance transportation. The Bio-fuels stream at World Bio Markets will tackle these challenges head on, and look at how bio-fuels producers and end users can make the most of the opportunities available. [READ MORE](#)

***International Biomass Conference & Expo — April 16-18, 2017 —
Atlanta, GA***

INTERNATIONAL
BIOMASS
CONFERENCE & EXPO
April 16-18, 2018
Cobb Galleria Centre
Atlanta, GA

International Biomass Conference & Expo is where future and existing producers of biobased power, fuels and thermal energy products go to network with waste generators and other industry suppliers and technology providers. It's where project developers converse with utility executives; where researchers and technology developers rub elbows with venture capitalists; and where Fortune 500 executives and influential policy makers sit side-by-side with American farmers and foresters.

Organized by BBI International and produced by Biomass Magazine, this event brings current and future producers of bioenergy and biobased products together with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and policy makers. International Biomass Conference & Expo is the largest, fastest-growing event of its kind. In 2018, this event is expected to draw nearly 1,200 attendees. In 2017, the event drew more than 1,000 attendees, doubling the attendance of the inaugural show. This growth is fueled by a world-class Expo and an acclaimed program. **Save \$250 on Registration With Discount Code ABUSA250** [READ MORE](#)

Following the success of its previous editions, ACI's 8th European Algae Industry Summit will explore the ongoing developments of the algae industry. With insights from key industry players, the conference will address both the technical and commercial aspects of algae production and its end-uses, in Europe and across the globe.

This edition of the summit will highlight different case studies on the various uses & products made from algae, during dedicated sessions.

The two day event will also propose an in-depth look into the technologies supporting the industry. The participants will also have the chance to discuss how to keep the industry thriving as a whole, through best practices & lessons learnt, as well as ensuring sustainability.

Exclusive Site Visit -- On the afternoon of Tuesday 24th April, a limited group of attendees will have the opportunity to visit the Ecoduna "Hanging Gardens" Plant. [READ MORE](#)

International Conference on Food Technology — May 14-16, 2018 — Rome, Italy

Theme: Optimizing food and nutritional demand with the help of recent technologies -- Food technology 2018 is hosted by EuroSciCon and it focuses on the major issues of food scarcity and nutritional imbalance in people. This is of great concern as the survival of future generation is at stake. Food is essential to live and nutrients to stay healthy so we invite Researchers, Food

Technologists, Nutritionists, Academicians, Industrialists and Dietitians to give the world a better solution to this problem. The conference will be a platform to globalize one research, to share scientific experiences, to gain knowledge on new technologies and regulations. The conference is scheduled on May 14-16, 2018 in Rome, Italy. We invite sponsors and exhibitors to showcase your products to our participants and make it reach the public through them. We request you to make use of this opportunity to make the world a better place to live in. [READ MORE](#) For 15% discount on registration fees, use the code ESCAB101

4th Symposium on Urban Mining and Circular Economy — May 21-23, 2018 — Bergamo, Italy

Following the great success of the third edition held in 2016, which saw the participation of almost 300 delegates from a wide variety of countries, SUM 2018 / 4th Symposium on Urban Mining and Circular Economy will be held in the old Monastery of Saint Augustine in Bergamo upper city, in May 2018.

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three

worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. This combination is equally important in other fields of waste management, although is of paramount relevance for a Circular Economy. SUM 2018 will focus on all relevant and innovative aspects relating to these three worlds. The Symposium will last three days and will include oral sessions, a poster session and a technical tour. VENICE2018 – 7th International Symposium on Energy from Biomass and Waste — October 15-18, 2018 — Venice, Italy

The production of energy from alternative sources and its impact on climate change are among the main strategic tools implicated in the sustainable development of our society. Numerous types of biomass and wastes contribute towards the production of energy and reduction in the use of fossil fuels by means of biological, chemical and thermal processes. Existing biomass and waste to energy technologies are currently undergoing rapid development. Despite growing interest in the use of these technologies, in many countries their implementation remains limited.

The aim of the Venice 2018 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2016, was attended by over 500 scientists and operators from approximately 57 different countries.

The seventh edition of the Symposium will feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies working in the field
- Expected attendance of over 600 delegates from tens of different countries worldwide [READ MORE](#)
