### *It's Boating Season!*

In a special piece for Advanced Biofuels USA, former U.S. Rep. **William Delahunt**, D-MA, gives boaters the credit they deserve for knowing the proper fuel for their boats' engines. And for knowing the difference between fuel labeled E10 and fuel labeled E15.

He also provides useful information about MTBE, ethanol "attracting" water and phase separation.

If you need a refresher, take a look:

### Boating, Biofuels and Dirty Politics

by William Delahunt\* (Special to Advanced Biofuels USA) Washington, D.C. is full of advocates. Some are very effective champions for important causes, but others get sucked into the maelstrom of competing special interests. Lately, I've seen ...

### ***Advanced Biofuels USA Response to US Pull Out from Paris Agreement***

So much has been written panicking that the US will after a long process "unsign" the COP 21 agreement to mitigate climate change. Biofuels were not included in any US plans to decrease our carbon footprint. Yet, work on decreasing use of petroleum and other fossil-based fuels went on. And, as executive director **Joanne Ivancic** writes, innovation, research and search for investment will continue.

### Have Faith that US Leadership in Advanced Biofuels Development Will Continue Regardless of Trump Administration Policy

by Joanne Ivancic\* (Advanced Biofuels U.S.A) For the record, Advanced Biofuels USA has faith that the world will continue to develop technologies and products to address climate change, improve air quality, and develop truly sustainable, renewable ...

### Visit Advanced Biofuels USA Exhibit at EnergyPath 2017 — For Our Future: Carbon Reduction on July 27, 2017 in Center Valley, PA

Advanced Biofuels USA executive director **Joanne Ivancic** will present an overview of biofuels along with an update on local endeavors and information about use of ethanol cook stoves at the July 27 symposium at EnergyPath 2017. Preceded by three days of Energy Camp, the symposium and exhibits cover a variety of renewable energy topics; and include student science fairs.

Come visit with Joanne and **Pamela (Pandy) Rockwell** at our information booth, courtesy of the

Sustainable Energy Fund.

We will also have displays of ethanol cook stoves from **Project Gaia**. [READ MORE](#)

### ***10th Biofuels International Conference and Expo — October 4-5, 2017 — Edinburgh, Scotland***

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services. **European Forum for Industrial Biotechnology & the Bioeconomy (EFIB) 2017**  
— October 9-11, 2017 — Brussels, Belgium

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy.

Industrial Biotechnology is currently worth €23 billion representing just 6% in sales of the overall worldwide chemicals market. However, it is significantly outperforming the overall chemicals market at an impressive 20% annual growth rate and has the potential to become the dominant technology of tomorrow's chemicals industry, representing a huge future opportunity.

Delivering on this opportunity will require significant investment, innovation and value chain development and most importantly new collaborations across the sector. Additionally we are faced with important challenges posed by high energy prices, the impact of the shale gas boom on the development of biobased chemicals markets and the ongoing need for predictable, coherent and supportive policy in the EU.

In order to understand and overcome these challenges and prosper in the industrial biotechnology market, industry experts throughout the vibrant and innovative biobased community come together to one central location every year to discuss the key issues and gain a snapshot of the most significant developments on scale up of commercial biorefineries around the world.

That location is the European Forum for Industrial Biotechnology & the Bioeconomy (EFIB), where delegates are provided with an update on the status and outlook of biobased industries. EFIB is proud to foster engagement between policy makers, a broad range of stakeholders connected with the existing biobased value chain and seeks to reach out to, and include, new interlocutors. **ABLC NEXT 2017 — October 16-18, 2017 — San Francisco, CA**

At ABLC NEXT, you'll meet application and platform developers, investors, policymakers, end-use customers and channel & development partners for the newest technologies of the advanced bioeconomy: health, nutrition, AgTech, genetics, big data, robotics, fuels, chemicals and materials. This is the place where digital and physical technologies converge.

ABLC NEXT is a connected series of 5 conferences on the

most important issues in the Bioeconomy right now. These conferences-within-a-conference are:

1. The Advanced Fuels Summit - focused this year on Advanced Biomass Diesel, BioCrude, Advanced Alcohols and Alternatives to gasoline.
2. The Renewable Chemicals & Biomaterials Summit - focused this year on Novel Performance Chemicals and Advanced Packaging.
3. The Sustainable Brands Summit - the technologies deployed by major brands — and their deployment, communications and performance goals.
4. The Advanced Nutrition Summit - advanced products and technologies for human and animal nutrition — more food, better food, and more customer choice.
5. The BioFrontiers Summit - the 30 Most Compelling technologies and solutions ready for development and commercialization from leading technology developers and labs. [READ MORE](#)
