***International Symposium on Green Chemistry — May 16-19, 2017 — La Rochelle, France***

The main objective of ISGC-2017 is to gather the most eminent scientists involved in the field of green chemistry to debate on the future challenges of Chemistry keeping in mind the problems of access to a sustainable energy, the management of resources (carbon, water, metals, minerals), Human development, global warming, impact on the environment and competitiveness of our Industry. To contribute to solve this complex equation, ISGC-2017 has been thought as a cross-disciplinary platform and should offer to public and private scientists an ideal platform for sharing fundamental knowledge with industrial research and development stakeholders. ISGC has created the "Green Chemistry Challenge" and offers an exhibition area, industrial sessions and 1-to-1 meetings.

***EUBCE 2017 – 25th European Biomass Conference and Exhibition — June 12-15, 2017 — Stockholmsmässan, Stockholm, Sweden***

The European Biomass Conference and Exhibition will celebrate its 25th edition in Stockholm from 12th to 15th June 2017.

As one of the world's leading R&D conference combined with an international exhibition, the EUBCE represents the leading platform for the collection,

exchange and dissemination of scientific know-how in the field of biomass.

The Conference Programme will address topics from biomass itself to bioliquids and biofuels for heat and electricity, transport and biobased products, covering all aspects of each value chain, from supply and logistics to conversion technologies, from industrial application of research results to impacts on the environment, from market and trade aspects to policy strategies, not least to the role of biomass as a source in integrated energy systems. ***Fuel Ethanol Workshop (FEW) — June 19-21, 2017 — Minneapolis, MN***

Now in its 33rd year, the FEW provides the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW is the largest, longest running ethanol conference in the world—and the only event powered by Ethanol Producer Magazine. From its inception, the mission of the event has remained constant: The FEW delivers timely presentations with a strong focus on commercial-scale ethanol production – from quality control and yield

maximization to regulatory compliance and fiscal management.

The 2017 FEW program is segmented into four concurrent tracks:

Track 1: Production & Operations

Track 2: Leadership & Financial Management

Track 3: Coproducts & Product Diversification

Track 4: Infrastructure and Market Development [READ MORE](#)

### ***10th Biofuels International Conference and Expo — October 4-5, 2017 — Edinburgh, Scotland***

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services. **European Forum for Industrial Biotechnology & the Bioeconomy (EFIB) 2017**  
**— October 9-11, 2017 — Brussels, Belgium**

EFIB is THE market leading annual event in Europe for Industrial Biotechnology and the Bioeconomy.

Industrial Biotechnology is currently worth €23 billion representing just 6% in sales of the overall worldwide chemicals market. However, it is significantly out-performing the overall chemicals market at an impressive 20% annual growth rate and has the potential to become the dominant technology of tomorrow's chemicals industry, representing a huge future opportunity.

Delivering on this opportunity will require significant investment, innovation and value chain development and most importantly new collaborations across the sector. Additionally we are faced with important challenges posed by high energy prices, the impact of the shale gas boom on the development of biobased chemicals markets and the ongoing need for predictable, coherent and supportive policy in the EU.

In order to understand and overcome these challenges and prosper in the industrial biotechnology market, industry experts throughout the vibrant and innovative biobased community come together to one central location every year to discuss the key issues and gain a snapshot of the most significant developments on scale up of commercial biorefineries around the world.

That location is the European Forum for Industrial Biotechnology & the Bioeconomy (EFIB), where delegates are provided with an update on the status and outlook of biobased industries. EFIB is proud to foster engagement between policy makers, a broad range of stakeholders connected with the existing biobased value chain and seeks to reach out to, and include, new interlocutors.
