International Biomass Conference and Expo — February 3-5, 2020 — Nashville, TN

Attendees of the 2020 Biomass Conference & Expo seek solutions to the everyday challenges they face.

The International Biomass Conference & Expo unites current and future producers of biomass-derived

power, fuels and chemicals with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and policy makers.

The event fosters public and private partnerships that help bioenergy producers and large-scale waste generators identify and assess available production resources and viable technology solutions for improving operational efficiencies and reducing industrial greenhouse gas emissions. Volatile energy costs, mounting climate change concerns and the anticipation of federal carbon cap-and-trade policies are compelling waste generators to think differently – much differently – about waste liabilities and, in some cases, the rising value of already valuable process side streams. Biodiesel Production Technology Summit — June 15-17, 2020 — Minneapolis, MN

A new conference dedicated to biodiesel and renewable diesel processing, the [Biodiesel Production Technology Summit](#), is organized by BBI International and produced by [Biodiesel Magazine](#). The event is a new forum designed for biodiesel and renewable diesel producers to learn about cutting-edge process technologies, new techniques and equipment to optimize existing production, and efficiencies to save money while increasing throughput and fuel quality.

The Biodiesel Production Technology Summit will feature premium content from technology providers, equipment vendors, consultants, engineers and producers to advance discussion while fostering an environment of collaboration and networking through captivating presentations and fruitful conversation, all with a single purpose—to further the biomass-based diesel sector beyond its current limitations.

From frontend pretreatment to backend quality measures and everything in between, this premiere event covers the technology gamut, leaving producers with practical solutions to their needs.

Presentations and discussions will focus on key areas of biodiesel and renewable diesel production. [READ MORE](#)
