BIO Latin America Conference 2016: Innovation, Investors and Institution in new Global Markets

Biotechnology Innovation Organization (BIO) promoted its first Latin America Conference in Sao Paulo October 26-28, 2016, co-hosted by Biominas and with the support of the Brazilian Industrial Biotechnology Association (ABBI) and Advanced Biofuels USA contributing author, **Lais**

Forti Thomaz, provides her insights on the policy and technical innovations relevant to the biofuels world.

The theme of this event was: "Accessing new global markets". Innovation, Investors and Institutions were the "three IN" emphasized. Raizen and GranBio, having produced cellulosic ethanol in Brazil, were represented at BIO Latin America and were able to discuss the challenges and difficulties that they have found on

the way to reaching commercial scale: from research and innovations and the pre-treatment of biomass, to the training and qualification of employees.

Panels discussed government and industry working together and developing synergies. One international example was the Below50 Campaign which convened a panel to promote its initiative to bring together big players. Those on the panel about sustainable fuels included UN Sustainable Energy For All, Roundtable on Sustainable Materials, Novozymes, DSM, GOL airlines. [READ MORE](#)

The New World Has Arrived: 16th International Conference Datagro Sugar and Ethanol Promotes the Innovations of the Sector

Lais Forti Thomaz also covered the Datagro Sugar and Ethanol Conference in Sao Paulo, Brazil. The main highlight of the event was the promotion of Nissan New technology for cars using e-bio cell fuel. The Solid Oxide Fuel-Cell (SOFC) powered-prototype vehicle was first launched during the Olympic games in August. The Nissan new car model runs on 100 percent ethanol. Through a chemical process with oxygen called reformation, the SOFC system

transforms ethanol into hydrogen that produces electricity.

On the political side, Sao Paulo and Goias Governors represented the support of the state governments. Sao Paulo is the state where ethanol has the biggest incentive due to a discount from the State tax called ICMS. Marconi Perillo, the governor of Goias, stated the he will request at the World Health Organization (WHO) a surcharge on the use of fossil fuels.

Academics got their turn with studies that reinforce the local benefits of the sugarcane supply chain. Profs. Marcia Moraes (ESALQ/University of Sao Paulo), Carlos Eduardo Caldarelli (Londrina State University) and Marcos Fava Neves (FEA/University of Sao Paulo) have shown how the growth of sugarcane and ethanol mills impacts municipal GDP. Carbon Pricing in North America – Leading a New Era of Climate Policy

Contributing author, **Tamaki Stiles**, attended the Washington, DC, forum at Resources for the Future (RFF) discussing carbon pricing developments in Canada, the United States and Mexico.

Following up on the presidents of the United States and Mexico and the Prime Minister of Canada meeting in June this year to establish partnerships on clean energy and the environment, one of the important outcomes of this meeting was a commitment to strive to have 50% of all electricity generation in North America from clean energy sources by 2025.

Carlos Munoz Pina, Lecturere at Instituto Tecnologico Autonomo de Mexico, **Rachel McCormick**, Counselor for Energy and Environment at the Embassy of Canada, and **Dallas Burtraw**, a senior fellow at Resources for the Future talked about carbon pricing as a driving factor for reaching this goal. Stiles' article summarizes the highlights of the discussion. [READ MORE](#)

Advanced Biofuels USA Exhibits at Small Farm Conference—A Seriously Knowledge-Intensive Activity on Maryland's Eastern Shore

"I want to make this land productive again," was a common refrain at the University of Maryland Eastern Shore's 13th Annual Small Farm Conference November 11-12. Whether returning to a disused family farm or starting on a new venture, many attendees shared a desire to bring something back to life.

Targeted to mid-Atlantic and coastal environmental, soil, market and business characteristics, sessions focused on agricultural opportunities, practices and practical information on funding, financing, insuring and operating small farms and agricultural businesses.

Advanced Biofuels USA participated as an exhibitor with special focus on the energy beet project in its initial stages at UMES. [READ MORE](#)

York, PA

A favorite winter activity--talking with people at the Keystone Farm Show at the fairgrounds in York, PA.

They call this the Farm Show for Farmers. Full-time farmers from Pennsylvania, New Jersey, Maryland, and Northern Virginia stop by to visit. If you are interested in seeing the latest in farm machinery and services for active farms and forests such as industrial sized wood-splitters, information about seeds, fertilizers, precision farming, tools, Extension services and agriculture-related organizations, spend a winter's day at the Keystone Farm Show. And stop by our booth, H-308.

The Keystone Farm Show is the fastest growing farm show on the East Coast! Started in January of 1998 to address the needs of agrimarketers in the Mid-Atlantic area, the show has nearly tripled in size! The Keystone Farm Show has been extended to 3 days to accommodate the increase in attendance.

This show targets only full-time farmers in Pennsylvania, New Jersey, Maryland, and Northern Virginia. Since its inception, the Keystone Farm Show has tripled in number of exhibitors and uses all available space at the York Fairgrounds including the newly refurbished Heritage Hall.

This show is only marketed to full-time farmers through the agricultural print media in the geographical area covered by Country Folks weekly farm newspapers. [READ MORE](#)

5th Central European Biomass Conference — January 18-20, 2017 — Graz, Austria

The Austrian Biomass Association, the Styrian Chamber of Agriculture and Bioenergy 2020+ GmbH organized in cooperation with Messe Graz from 18 to 20 January 2017 in Graz . 5 Central European Biomass Conference. The agreement at the UN Climate Change Conference 2015 in Paris provides the go-ahead for the global energy revolution. Investments that flowed so far in the fossil energy supplies are increasingly being diverted to renewable energy, under which bioenergy in Europe is the most important. The opportunities for Central Europe, to benefit from the investments in infrastructure and plant engineering as well as the positive effects of bioenergy use are excellent. [READ MORE](#)

14th International Conference on Renewable Mobility “Fuels of the Future 2017” — January 23-24, 2017 — Berlin, Germany

The program of the 14th International Conference on Renewable Mobility “Fuels of the Future” is now available for you at www.fuels-of-the-future.com. On behalf of the co-organizers, the Union for the Promotion of Oil and Protein Plants (UFOP), the Association of German Bioethanol Producers (BDBe), the Association of the German Biofuels Industry (VDB) and the German Biogas Association (FvB), I cordially invite you to take part on 23/24 January 2017 at Berlin’s CityCube.

As the highlight event of the German and European biofuel industry with more than 500 participants from 30 countries, the specialist conference is a must-attend event for the exchange

with German and international stakeholders from politics, the industry and research.

The contents of the conference program have been extended to account for the increasing diversification of engine technologies as well as the research and production of various fuels from renewable energy sources. Lignofuels 2017 — February 1-2, 2017 — Helsinki, Finland

Advanced Biofuels & Materials — Following the success of the last year's conference in Munich, Germany with Clariant's Sunliquid plant visit, and the previous one to that in Madrid with the Abengoa's demonstration plant site visit. We are delighted to announce that next Lignofuels 2017 Conference will be taking place at the heart of the wood bioenergy

industry – Finland.

The main conference will be held in Helsinki, on the 1st and 2nd of February 2017. A day prior the main conference, 31st of January 2017, a limited number of conference attendees will have the unique opportunity to join an exclusive site visit to the UPM Lappeenranta Biorefinery – The world's first commercial scale wood-based biorefinery in Lappeenranta, Finland.

Already on its 9th edition, this two day conference will bring together key industry stakeholders. We would like to invite you to join our forum discussions and take advantage of excellent networking opportunities, meeting leaders from advanced generation biofuels companies from across the globe. International Symposium on Green Chemistry — May 16-19, 2017 — La Rochelle, France

The main objective of ISGC-2017 is to gather the most eminent scientists involved in the field of green chemistry to debate on the future challenges of Chemistry keeping in mind the problems of access to a sustainable energy, the management of resources (carbon, water, metals, minerals), Human development, global warming, impact on the environment and competitiveness of our Industry. To contribute to solve this complex equation, ISGC-2017 has been thought as a cross-disciplinary platform and should offer to public and private scientists an ideal platform for sharing fundamental knowledge with industrial research and development stakeholders.

On the continuation of the previous editions, ISGC-2017 will gather more than 800 attendees from all around who will exchange on the most recent advances in the field of green chemistry through plenary lectures, keynotes, oral and flash communications and posters organized around multi-parallel sessions with 6 principal topics and industrial sessions.

New in 2017 : to facilitate access to cutting edge research and enable industrials to present their

know-how, technologies and innovations, ISGC has created the "Green Chemistry Challenge" and offers an exhibition area, industrial sessions and 1-to-1 meetings for all the participants, with ability to send or receive meeting requests and view companies & academic laboratories profiles. EUBCE 2017 – 25th European Biomass Conference and Exhibition — June 12-15, 2017 — Stockholmsmässan, Stockholm, Sweden

The European Biomass Conference and Exhibition will celebrate its 25th edition in Stockholm from 12th to 15th June 2017.

As one of the world's leading R&D conference combined with an international exhibition, the EUBCE represents the leading platform for the collection,

exchange and dissemination of scientific know-how in the field of biomass.

The Conference Programme will address topics from biomass itself to bioliquids and biofuels for heat and electricity, transport and biobased products, covering all aspects of each value chain, from supply and logistics to conversion technologies, from industrial application of research results to impacts on the environment, from market and trade aspects to policy strategies, not least to the role of biomass as a source in integrated energy systems.

The EUBCE is supported by European and international organizations such as the European Commission, UNESCO – United Nations Educational, Scientific and Cultural Organization – Natural Sciences Sector, WCRE – the World Council for Renewable Energy, EUBIA – the European Biomass Industry Association, The Central European Initiative, The Global Bioenergy Partnership and other organisations.

The Technical Programme is coordinated by DG Joint Research Centre of the European Commission. [READ MORE](#)
