[A First-Hand Report by High School Scientist, Erika Tan, Explores the Highs and Lows of Research](#)

Advanced Biofuels USA always welcomes thoughtful inquiries from students of all ages. We've fielded calls from elementary school students through graduates working on Ph.D's and have met some wonderful, exciting people in that way, people with whom we have developed lasting relationships. Calls and emails come from around the US and the world.

Recently, two young women from Freehold High School in New Jersey who were preparing a contest proposal for the

MIT THINK competition sought a source for cellulosic hydrolysate that they could list in their proposal and count on if they were chosen to continue.

At my request, **Erika Tan** put to paper the story of their experience, the initial ideas, the pivots, the excitement, the developing of relationships, the character-building experience of profound disappointment. Her story

reflects the stories of so many others engaged in this advanced biofuels enterprise from small start-ups through multi-national, high-financed projects. I think you will enjoy reading her thoughts and remember what it was like to first discover the wonders of science. [READ MORE](#) -

Insights about Feedstock from the Advance Bioeconomy Leadership Conference

Joanne Ivancic, Advanced Biofuels USA executive director, shares thoughts and insights gathered at Biofuels Digest's annual Washington, DC event. She focuses on three key points: The value of the farmers/growers perspective of biofuels; Rethinking the value of using dedicated crops as compared to a focus on residues and waste; and The weakness that uncertain policy poses. Future Activities: Come See Us!

We will be covering the occasional local DC events related to biofuels. Look for us!

Internship and Volunteer Fair Season. March 21, Find Us at Hood College.

As an all-volunteer organization, Advanced Biofuels USA provides an opportunity for students, retirees, those "between jobs" and professionals who want to volunteer for an organization that furthers their personal and professional goals. We welcome cold calls about helping us out. And we also take advantage of local internship/volunteer fairs. Most recently, we joined about 20 organizations at the Bethesda Green incubator.

These events also provide an opportunity to talk about biofuels and their role in transitioning to sustainable renewable transportation fuels. And to talk about the resources available from Advanced Biofuels USA.

Come see us at Hood College to find out more.

MARCHING IN WASHINGTON Give Renewable Sustainable Transportation Fuels a Presence and a Voice!

Most important, coming up is the **March for Science in Washington on April 22** (great way to spend Earth Day) and the **Peoples' Climate March on April 29**, bookending Earth Week. We want to make sure that biofuels, renewable, sustainable transportation fuels, have a presence

and a voice. ***Please let Joanne Ivancic know if you will be participating--or if you want to know more.*** She has been attending organizing meetings and will provide information about routes and meeting spots by email.

In the meantime, contact event organizers directly--

7th European Algae Industry Summit — April 26-27, 2017 — Nice, France

The two day summit will bring together key players within the algae industry including leaders from cosmetics, food, feed, nutraceuticals and pharmaceuticals across the globe to join our forum discussions and gain a deeper understanding of recent industry developments and, most importantly, economically viable applications.

Exclusive Site Visit: In addition to the main two day event, during the afternoon of Tuesday 25th April 2017 a limited number of summit delegates will receive a unique opportunity to join an exclusive site visit to Camporosso Archimede Ricerche facility (APG group) in Ligurian Riviera, Italy. There is no extra charge to attend, but spaces are strictly limited and allocated on a first-come, first-served basis, so it is highly recommended to book as soon as possible to guarantee availability.

Algae end market users in cosmetics, flavours, nutrition, animal feed, food, algae producers & cultivation plant owners and operators, leading algae/biomass research institutes, technology providers for cultivation, harvesting, dewatering, drying, oil extraction and processing, plant engineers and constructors, biofuel producers and green energy & biotech investors. **Advanced Biofuels USA readers/subscribers are entitled to a discount on registration. 10th Biofuels International Conference and Expo — October 4-5, 2017 — Edinburgh, Scotland

Now that the European Commission has released its plans for biofuels post 2020 with RED II, the industry can plan and prepare accordingly.

Opportunities undoubtedly still remain as the sector evolves taking new legislation into account and renewable energy targets must still be met with governments committed to

reducing their country's GHG imprint. Biofuels will continue to play a crucial role in the fuel supply chain with current and new producers looking to improve their processes and search for new markets, whether that be aviation, marine or vehicle biofuels.

For the first time held in partnership with Bioenergy Insight conference & expo, it will focus on the latest developments in biofuels policy, international biofuels trading, sustainability, solutions for first generation producers, progress in advanced biofuels and information on feedstock pricing and trends. It's a must attend industry event with many great networking opportunities. With over 200 attendees over 2 days of high level presentations and discussions it is an excellent opportunity to engage with the market and to highlight your company's products and services.
