Advanced Biofuels USA Provided Practical Information at #ClimateStrike Gathering

Advanced Biofuels USA's treasurer and resident engines/fuels expert, **Bob Kozak** and executive director **Joanne Ivancic** brought the E85 retrofitted 2002 Ford Focus to a local #ClimateStrike event in Frederick, MD.

"Giving information about biofuels in general and being able to show a practical way to make existing vehicles as clean and green as possible was the best way to participate in the climate change event," said Ivancic. "So many people still think that just avoiding tailpipes is the way to go. We could show them something to do until EVs are available, affordable, powered by renewables using "fair trade" batteries."

State Senator and former city mayor, **Ron Young**, stopped by to learn more about the retrofit. A long time supporter of environmental policies and renewable fuels, Senator Young included photos with us on his [Facebook](#) post. We look forward to continuing to work with Senator Young on climate change policies.

Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us! [Let us know](#) if you're planning to be at any of these and would like to chat with someone from the Advanced Biofuels USA team!

Meet Board Member Lais Thomaz at these October and November Events in Brazil

Advanced Biofuels USA board member, **Lais Thomaz** is busy this spring in Brazil (fall for those of us further north) working on bioeconomy policies and taking her expertise in international relations and policy to three important events: the **S&P Global Platts Sugar and Ethanol Forum**, the **DATAGRO Sugar and Ethanol Conference**, the **VI Biogas Forum** and the **VII Congress of the Brazilian Biodiesel Technology and Innovation Network**.

Accompanying Thomaz to the S&P Global Platts Sugar and Ethanol Forum and VI Biogas Forum events will be international law and contracts attorney **Cacia Pimentel**.

They will participate in talks and discussions with representatives of public entities and private sector companies gathering insights and discussing opportunities in and challenges for both the ethanol and biodiesel industries and emerging Brazilian biogas markets.

Two of Thomaz' students at the Federal University of Goiás will also have the opportunity to attend the events and assist with coming articles.

Victor Anequini will be with Thomaz at the 19th International DATAGRO Conference About Sugar And Ethanol, one of the major events in the global sugar and ethanol schedule.

Jakeline Oliveira will assist at the November biodiesel event which will focus on entrepreneurship and innovation.

If you are at any of these conferences, please say 'Hello' and share your thoughts with the Advanced Biofuels USA teams. Or [let us know now](#) and we'll arrange a meeting.

We'll Be There! Advanced Bioeconomy Leadership Conference (ABLC 2020) — March 25-27, 2020 — Washington, DC

A can't miss event in Washington, DC, especially during the presidential election year. Advanced Biofuels USA will be there.

Every year there's so much to learn, to get the feeling of the industry and the policy arenas. We

hope to see you there, too. [READ MORE](#)

Made from renewable resources, lignocellulosic ethanol is considered to be environmentally friendly, thus we are facing the effort to rehabilitate corn ethanol whilst keeping up with the renewable fuel standards. Following the success of the European

edition of Lignofuels conference which is now in its 10th year running and going from strength to strength, ACI is thrilled to announce that the American edition of Lignofuels will be taking place in Omaha, NE on October 30th & 31st 2019.

Lignofuels Americas is a platform to meet insightful leaders through the research talks and presentations and encourage many novel approaches of production and scale up of renewable energy.

Over the two days, this summit will bring together key lignofuels stakeholders to join our forum discussions and networking, including leaders from advanced generation biofuels companies from across the globe represented by Technical, Strategic and Business Development Executives from First and Advanced Generation Biofuels Producers, Oil Refiners, Process Technology Providers, Enzyme Developers, Engineering Firms and Agribusiness as well as Financiers, Investors, Policy & Regulators, Automotive & Aviation Industries, Consultants, Traders & Brokers and Chemical Companies.

With its interactive format and networking breaks it will also provide a senior level platform for representatives of the entire value chain, allowing attendees to benefit from excellent networking opportunities! [READ MORE](#)

Biogas Forum/FÓRUM DO BIOGÁS: “O Biogás e o Novo Mercado de Gás” — October 31-November 1, 2019 — São Paulo, Brasil

Energy utilization of waste through biogas has been increasingly present in various spheres of society. This growing interest is due, in particular, to the fact that the advantages of biogas are not limited to power generation, but also to help reduce emissions, promote the circular economy and strengthen national energy security.

It is for the interest in consolidating the discussions and strengthening the public and private agents involved in this sector that the Biogas Forum is already in its 6th edition.. Institutions and companies from various sectors related to biogas production, exploitation and processing will once again have the opportunity to introduce themselves to a professional audience and make contacts. Innovative talks and discussions with representatives of public entities and private sector companies will provide industry insights and discuss opportunities and challenges for biogas in the New Gas Market.

In parallel to the forum will be held a “matchmaking” between companies from different parts of the world, aiming at information exchange, project discussion, formation and consolidation of partnerships. [READ MORE](#)

ACI's Future of Biogas Europe Conference — November 13-14, 2019 — Amsterdam, Netherlands

The European biogas market is set to witness strong growth on account of growing focus toward decarbonizing the energy sector supported by a multitude of legislative schemes and policies. Increased production and use of biogas to support the circular economy and renewable energy mix will stimulate the industry growth in the region.

According to recent report published by Global Market Insights, Inc. says Europe Biogas Market is expected to surpass USD 6 Billion by 2025.

The World Biogas Association estimates that by 2020, the biogas sector in the Netherlands has the potential to produce 1.2 billion m³ of biogas or 0.75 billion m³ of biomethane, increasing to 3.7 billion and 2.2 billion m³ respectively by 2030 (Green Gas Forum, 2014). Significant growth is expected in biogas from manure, sewage sludge, grass and seaweed. [READ MORE](#)

2020 — Nashville, TN***

Attendees of the 2020 Biomass Conference & Expo seek solutions to the everyday challenges they face. The International Biomass Conference & Expo unites current and future producers of biomass-derived power, fuels and chemicals with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and policy makers.

The event fosters public and private partnerships that help bioenergy producers and large-scale waste generators identify and assess available production resources and viable technology solutions for improving operational efficiencies and reducing industrial greenhouse gas emissions. Volatile energy costs, mounting climate change concerns and the anticipation of federal carbon cap-and-trade policies are compelling waste generators to think differently – much differently – about waste liabilities and, in some cases, the rising value of already valuable process side streams. Biodiesel Production Technology Summit — June 15-17, 2020 — Minneapolis, MN

A new conference dedicated to biodiesel and renewable diesel processing, the [Biodiesel Production Technology Summit](#), is organized by BBI International and produced by [Biodiesel Magazine](#). The event is a new forum designed for biodiesel and renewable diesel producers to learn about cutting-edge process technologies, new techniques and equipment to optimize existing production, and efficiencies to save money while increasing throughput and fuel quality.

The Biodiesel Production Technology Summit will feature premium content from technology providers, equipment vendors, consultants,

engineers and producers to advance discussion while fostering an environment of collaboration and networking through captivating presentations and fruitful conversation, all with a single purpose—to further the biomass-based diesel sector beyond its current limitations.

From frontend pretreatment to backend quality measures and everything in between, this premiere event covers the technology gamut, leaving producers with practical solutions to their needs.

Presentations and discussions will focus on key areas of biodiesel and renewable diesel production. [READ MORE](#)
