### Learn about a Biofuels Project in Maryland at EnergyPath 2016 Conference — July 28-29 — Penn State/State College, PA.

Visit the Advanced Biofuels USA information table at the EnergyPath Expo to learn about advanced biofuels developments around the world.

energypath

Also, Advanced Biofuels USA executive director, **Joanne Ivancic**, will provide an update on the initial stages of a biofuels project in Maryland as part of the EnergyPath 2016 conference. Attend this session at 3:00 PM on Thursday, July 28.

"This event focuses on hands-on, practical information as well as on how "What You Can Do" fits into the big picture," explains Ivancic. "I look forward to participating with the exciting, inspiring attendees which include many students, faculty, business leaders, innovators, thought leaders and "doers" of all kinds." [READ MORE](#)

Don't forget, EnergyPath offers scholarships to students, teachers and faculty. [Get more information here.](#)

### Visit Our Info Table at the Maryland Clean Energy Center Advisory Council Annual Meeting

The MCEC Advisory Council is an important group of stakeholders called upon to help set work plan priorities, carry out the activities, and establish legislative positions for the Maryland Clean Energy Center. Members include representatives from a broad cross section of the energy industry stakeholders including large corporations, small contractors, utilities, banks, and building sector interests as well as association managers and government agencies. At their annual meeting on September 7 in Baltimore, Advanced Biofuels USA will staff an information table.

"The MCEC Advisory Council provides insight and information to guide the work plan for the Maryland Clean Energy Center," said Board Chairman George Ashton, "their input is pivotal to advancing the adoption of clean energy, energy efficiency

products, services and technologies in the state." **Joanne Ivancic**, Advanced Biofuels USA executive director serves on the council.

**Visit us at Booth H-308 at the Keystone Farm Show — January 10-12, 2017 — York, PA**

A favorite winter activity--talking with people at the Keystone Farm Show at the fairgrounds in York, PA.

They call this the Farm Show for Farmers. Full-time farmers from Pennsylvania, New Jersey, Maryland, and Northern Virginia stop by to visit. If you are interested in seeing the latest in farm machinery and

services for active farms and forests such as industrial sized wood-splitters, information about seeds, fertilizers, precision farming, tools, Extension services and agriculture-related organizations, spend a winter's day at the Keystone Farm Show. And stop by our booth, H-308.

***EnergyPath 2016 Energy Camp, Conference and Expo — July 24-29 — Penn State/State College, PA***

Emerging Technology and Business Models

EnergyPath is the region's largest sustainable energy event attracting industry professionals, policymakers and academia throughout the region and across the United States. The goal of EnergyPath is to increase the knowledge of and passion for sustainable energy in the leaders of today and tomorrow.

EnergyPath 2016 has something for everyone: Learn about renewable technologies, energy efficiency techniques and start or expand your career in the energy industry with a crash course in sustainable energy.

Energypath is an ideal place to exhibit to an audience of diverse attendees including students, professors, industry professionals, policy makers and energy users who are interested in renewable energy and energy efficiency. ***Euro Global Summit and Expo on Biomass — August 08-09, 2016 —  
Birmingham, UK***

OMICS International Conferences invites all the participants from all over the world to attend 'Euro Global Summit & Expo on Biomass' held during August 08-09, 2016 at Birmingham, UK.

**Conference Highlights:**

- Biomass Conversion Methods
- Biomass Applications
- Biomass Energy Resources
- Supply Chain Management
- Bioenergy Conversion Methods
- Environmental Impact of Biomass
- Biomass Handling
- Advanced Biofuels
- Biomass Market Analysis
- Production of Biofuels
- Landfill Gas as a Renewable Energy Resource
- Biomass from Microbial Sources

**Symposium on Thermal and Catalytic Sciences for Biofuels and Biobased Products — November 1-4, 2016 — Chapel Hill, NC**

The 2016 symposium will spotlight recent technical advances in thermochemical biomass conversion to biofuels, bioproducts, and biopower and provide a showcase for energy experts to introduce themselves and their research to the audience to look for unique collaboration opportunities.

This symposium has been held every other year following the first symposium held in 2010 at Iowa State University with the goal of focusing on thermochemical biomass research and development and providing early career scientists and engineers an opportunity to present their research and interact with the senior researchers in the community. A tradition at these meetings has been the student poster competition recognizing outstanding poster contributions by undergraduate and graduate students.

A renewed enthusiasm for thermochemical biomass conversion emerged in the early 2000s with increased federal budgets, renewable fuel standards, pre-commercial demonstration of technologies, and the advent of advanced (hydrocarbon) biofuels. Prominent researchers in the field wanted to build on the success of earlier meetings and convene another symposium series focused more on opportunities for the next generation of thermochemical biomass researchers. The aim of the Venice 2016 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2014, was attended by over 500 scientists and operators from approximately 54 different countries.

The sixth edition of the Symposium will

feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies

working in the field

- Expected attendance of over 600 delegates from tens of different countries worldwide

***International Symposium on Green Chemistry — May 16-19, 2017 — La Rochelle, France***

The main objective of ISGC-2017 is to gather the most eminent scientists involved in the field of green chemistry to debate on the future challenges of Chemistry keeping in mind the problems of access to a sustainable energy, the management of resources (carbon, water, metals, minerals), Human development, global warming, impact on the environment and competitiveness of our Industry. To contribute to solve this complex equation, ISGC-2017 has been thought as a cross-disciplinary platform and should offer to public and private scientists an ideal platform for

sharing fundamental knowledge with industrial research and development stakeholders.

On the continuation of the previous editions, ISGC-2017 will gather more than 800 attendees from all around who will exchange on the most recent advances in the field of green chemistry through plenary lectures, keynotes, oral and flash communications and posters organized around multi-parallel sessions with 6 principal topics and industrial sessions.

New in 2017 : to facilitate access to cutting edge research and enable industrials to present their know-how, technologies and innovations, ISGC has created the "Green Chemistry Challenge" and offers an exhibition area, industrial sessions and 1-to-1 meetings for all the participants, with ability to send or receive meeting requests and view companies & academic laboratories profiles.
