Future Activities: Come See Us!

We will be covering the occasional events related to biofuels. Look for us!

At World Bio Markets, March 20-22, 2018 in Amsterdam, Netherlands, Visit with Us.

Michael Eggelston will be covering this premier event for Advanced Biofuels USA. All levels of the bio-based value chain; including government, feedstock producers, logistics providers, investors, chemicals and fuels producers, and brands and end users come together for this annual event. The Bio-fuels stream at World Bio Markets will tackle today's challenges head on, and look at how bio-fuels producers and end users can make the most of the opportunities on the horizon from second and third generation feedstocks and new markets in long distance transportation. Brussels' April Focus on Renewable Energy Directive Biofuel Details. Advanced Biofuels USA Will Be There.

Steve Bi and **Michael Eggleston** will cover the discussions about sustainability, defossilization and renewable transportation fuels policy taking place in Brussels, Belgium in mid-April for Advanced Biofuels USA.

Beginning with the [Low Carbon Fuel Conference on April 10-11, 2018 in Brussels](#), moving to the [8th Stakeholder Plenary Meeting "What is the Contribution of Biofuels to Achieve the 2 Degree Target of the International Climate Policy?" April 11-12, 2018](#) and winding up at Greenovate! Europe's [Innovation in the Bioeconomy: Overcoming Barriers for Sustainable Bio-Based Products and Biofuels on April 12, 2018](#).

Biofuels are one of the key options under discussion to defossilize transportation and shipping. The Impact Assessment of the EC in preparation of RED2 (Brussels, 30.11.2016 SWD (2016) 418 final PART 1/4, p. 36) shows the contribution required from biofuels.

Beyond 2030, modelling suggests the share of biofuels in liquid and gaseous transport fuels will need to increase significantly, reaching around 46% by 2050 (equal to 36-37% of total transport energy demand when electromobility is included). Certainly, biofuels will be key to defossilize the heavy duty, waterborne and aviation sectors.

Last years' debates about 1st and 2nd generation biofuels, fuels vs food, ILUC and

sustainability created a period of uncertainty for industry involved in the biofuels sector. For biofuels to be part of the solution, it will be crucial to address sustainability issues adequately. These topics will be taken up at these conferences.

Watch for their reports online at www.AdvancedBiofuelsUSA.org in the [Original Writing, Opinions Advanced Biofuels USA](#) category.

If you are at these conferences, meetings and events and want to share your thoughts, be sure to let them know.

Talk with Michael Eggelston at the Transport Research Arena 2018 — April 16-19, 2018 — Vienna, Austria; and at the 4th Symposium on Urban Mining and Circular Economy — May 21-23, 2018, in Bergamo, Italy

To address the great challenges of the future mobility system, Austria has been running specific national transport related research programmes. Together with the European Commission, the European Technology Platforms on /Transport and Mobility, the Austrian Ministry of Transport, Innovation and Technology, the Austrian Institute of

Technology and AustriaTech are hosting the seventh edition of **TRA 2018** in Austria.

TRA 2018 will include a broad spectrum of research and innovation activities, which will range from basic research to application-oriented engineering, social, technical and economic aspects, as well as policies and standards.

SUM
2018

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. Explore these concepts at the **Urban Mining and Circular Economy** conference.

If you are attending these conferences and have a project, process or product that relates to transportation biofuels or the circular economy, let **Michael Eggleston** know. He'll be covering these conferences and following up with articles about the news he gathers there. [READ MORE](#)

Carbon Capture Utilization and Storage Conference — March 19-22, 2018 — Nashville, TN

The CCUS Conference is designed for U.S. and international leaders, technical experts, researchers, and industry executives in the field of carbon capture, utilization and storage to gather and discuss efforts to decarbonize the energy and industrial sectors.

Carbon capture and storage (CCS) technologies have the potential to secure up to 90% of CO₂ emissions, however this technology is just reaching maturity. This Conference brings together carbon capture and GHG reduction technology decision-makers, scientists, and government officials to network, get high-level strategic update, hear case studies on emerging technologies and connect on research in the industry to advance this important technology.

Session topics include:

- Carbon Capture Policy
- Major CCUS Projects
- CCS as a Bipartisan Issue
- CCS from a Global Perspective

Technical sessions include capture, utilization, storage, storage-monitoring and policy. Poster sessions are also presented on the exhibit floor of the ELECTRIC POWERConference + Exhibition. For the second year, CCUS will be co-locating with ELECTRIC POWER Conference + Exhibition. [READ MORE](#) Register with this link and Use Code ABUSA for discount.

World Bio Markets — March 20-22, 2018 — Amsterdam, Netherlands

**20th-22nd March 2018,
Amsterdam**

The conference brings together all levels of the bio-based value chain; including government, feedstock producers, logistics providers, investors, chemicals and fuels producers, and brands and end users.

Bio-fuels producers have faced numerous challenges in recent years, from the low price of oil to the advance of electric vehicles and growing public and regulatory pressure towards more sustainable business practices. Yet there are opportunities on the horizon from second and third generation feedstocks and new markets in long distance transportation. The Bio-fuels stream at World Bio Markets will tackle these challenges head on, and look at how bio-fuels producers and end users can make the most of the opportunities available. [READ MORE](#)

Gasification 2018 — March 28-29, 2018 — Frankfurt, Germany

ACI's 7th Annual Gasification Summit, taking place on first quarter of 2018 in Frankfurt, Germany, will comprise two days of formal presentations, interactive roundtable discussions and excellent networking opportunities, providing an ideal setting to convene with your peers to discuss both current operational & future planned gasification plants, end product markets, potential barriers & support policies as well as project economics & finance. International Biomass Conference & Expo — April 16-18, 2017 — Atlanta, GA

International Biomass Conference & Expo is where future and existing producers of biobased power, fuels and thermal energy products go to network with waste generators and other industry suppliers and technology providers. It's where project developers converse with utility executives; where researchers and technology developers rub elbows with venture capitalists; and where Fortune 500 executives and influential policy makers sit side-by-side with American farmers and foresters.

Organized by BBI International and produced by Biomass Magazine, this event brings current and future producers of bioenergy and biobased products together with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and

policy makers. International Biomass Conference & Expo is the largest, fastest-growing event of its kind. In 2018, this event is expected to draw nearly 1,200 attendees. In 2017, the event drew more than 1,000 attendees, doubling the attendance of the inaugural show. This growth is fueled by a world-class Expo and an acclaimed program. ACI's 8th European Algae Industry Summit — April 25-26, 2018 — Vienna, Austria

Following the success of its previous editions, ACI's 8th European Algae Industry Summit will explore the ongoing developments of the algae industry. With insights from key industry players, the conference will address both the technical and commercial aspects of algae production and its end-uses, in Europe and across the globe.

This edition of the summit will highlight different case studies on the various uses & products made from algae, during dedicated sessions.

The two day event will also propose an in-depth look into the technologies supporting the industry. The participants will also have the chance to discuss how to keep the industry thriving as a whole, through best practices & lessons learnt, as well as ensuring sustainability.

Exclusive Site Visit -- On the afternoon of Tuesday 24th April, a limited group of

attendees will have the opportunity to visit the Ecoduna “Hanging Gardens” Plant. [READ MORE](#)

International Conference on Food Technology — May 14-16, 2018 — Rome, Italy

Theme: Optimizing food and nutritional demand with the help of recent technologies -- Food technology 2018 is hosted by EuroSciCon and it focuses on the major issues of food scarcity and nutritional imbalance in people. This is of great concern as the survival of future generation is at stake. Food is essential to live and nutrients to stay healthy so we invite Researchers, Food Technologists, Nutritionists, Academicians, Industrialists and Dietitians to give the world a better solution to this problem. The conference will be a platform to globalize one research, to share scientific experiences, to gain knowledge on new technologies and regulations. The conference is scheduled on May 14-16, 2018 in Rome, Italy. We invite sponsors and exhibitors to showcase your products to our participants and make it reach the public through them. We request you to make use of this opportunity to make the world a better place to live in. [READ MORE](#) For 15% discount on registration fees, use the code ESCAB101

4th Symposium on Urban Mining and Circular Economy — May 21-23, 2018 — Bergamo, Italy

Following the great success of the third edition held in 2016, which saw the participation of almost 300 delegates from a wide variety of countries, SUM 2018 / 4th Symposium on Urban Mining and Circular Economy will be held in the old Monastery of Saint Augustine in Bergamo upper city, in May 2018.

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three

worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. This combination is equally important in other fields of waste management, although is of paramount relevance for a Circular Economy. SUM 2018 will focus on all relevant and innovative aspects relating to these three worlds. The Symposium will last three days and will include oral sessions, a poster session and a technical tour. VENICE2018 – 7th International Symposium on Energy from Biomass and Waste — October 15-18, 2018 — Venice, Italy

The production of energy from alternative sources and its impact on climate change are among the main strategic tools implicated in the sustainable development of our society. Numerous types of biomass and wastes contribute towards the production of energy and reduction in the use of fossil fuels by means of biological, chemical and thermal processes. Existing biomass and waste to energy technologies are currently undergoing rapid development. Despite growing interest in the use of these technologies, in many countries their implementation remains limited.

The aim of the Venice 2018 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2016, was attended by over 500 scientists and operators from approximately 57 different countries.

The seventh edition of the Symposium will feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies working in the field
- Expected attendance of over 600 delegates from tens of different countries worldwide [READ MORE](#)
