Talk with Michael Eggelston at the 4th Symposium on Urban Mining and Circular Economy — May 21-23, 2018, in Bergamo, Italy

The logo for SUM 2018 features the word "SUM" in a large, bold, black font with a textured, mosaic-like appearance. Below it, the year "2018" is written in a large, blue, sans-serif font. The background of the logo is a light blue grid of small, faint text.

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. Explore these concepts at the **Urban Mining and Circular Economy** conference.

If you are attending these conferences and have a project, process or product that relates to transportation biofuels or the circular economy, let **Michael Eggleston** know. He'll be covering these conferences and following up with articles about the news he gathers there. [READ MORE](#) Here's the [latest program](#).

4th Symposium on Urban Mining and Circular Economy — May 21-23, 2018 — Bergamo, Italy

Following the great success of the third edition held in 2016, which saw the participation of almost 300 delegates from a wide variety of countries, SUM 2018 / 4th Symposium on Urban Mining and Circular Economy will be held in the old Monastery of Saint Augustine in Bergamo upper city, in May 2018.

To achieve a virtuous application and optimization of current practice, urban mining and circular economy are dependent on the appropriate combination of three worlds (TRIANGLE concept): research and technology (private and public) / administration, economy and industry / policy and regulation. This combination is equally important in other fields of waste management, although is of paramount relevance for a Circular Economy. SUM 2018 will focus on all relevant and innovative aspects relating to these three worlds. The Symposium will last three

days and will include oral sessions, a poster session and a technical tour. [READ MORE](#)

Fuel Ethanol Workshop (FEW) — June 11-13, 2018 — Omaha, NE

Now in its 34th year, the FEW provides the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW is the largest, longest running ethanol conference in the world—and the only event powered by Ethanol Producer Magazine.

From its inception, the mission of the event has remained constant: The FEW delivers timely presentations with a strong focus on commercial-scale ethanol production – from quality control and yield maximization to regulatory compliance and fiscal management. The FEW is also the ethanol industry’s premier forum for

unveiling new technologies and research findings. The program extensively covers cellulosic ethanol while remaining committed to optimizing existing grain ethanol operations. [READ MORE](#)

***BIO World Congress on Industrial Biotechnology — July 16-19, 2018
— Philadelphia, PA***

The BIO World Congress on Industrial Biotechnology provides a unique forum for business executives, government officials, academic researchers and industry leaders to share the latest advances in renewable chemicals, synthetic biology, enzymes, food ingredients, biofuels and more.

Top Reasons to Attend:

- Meet and network with 1,000 global business leaders, investors and policy makers.
 - Attend education all week that covers the latest in Industrial Biotech including Synthetic Biology and Genetic Editing, Advanced Biofuels, Biobased Materials, Renewable Chemicals, Flavors, Fragrances and Food Ingredients, Agricultural Crop Technologies, Biomass Supply and new this year Algae.
 - Schedule targeted meetings using our BIO One-on-One Partnering System - partnering activity is at an all-time high and is open to all attendees.
 - Experience and learn about the latest in technology and innovation in the Exhibit Hall and throughout the event. [READ MORE](#)

Revolution in Food and Biomass Production (REFAB) — October 1-2, 2018 — Cologne, Germany

friendly products?

The conference will bring together future-oriented experts from companies, start-ups and research to have a look at the future of food and biomass production.

What high-tech strategies are emerging on the horizon to sustainably supply a growing world population with healthy food – and at the same time provide industry with sustainable biomass for environmentally

The conference gives a unique opportunity to meet the pioneers and forerunners of the future of food and biomass production. Don't miss the revolution, be part of it.

The two-day conference will feature about 50 presentations, more than 500 participants (mainly from industry) and 30 exhibitors are expected. Find the preliminary programme at www.refab.info/programme www.refab.info/registration

In addition, participants from developing countries will receive a 50% discount as long as registration is open. (Early bookers from developing countries will even receive a 60%). Please use the code DEV18

Thermal & Catalytic Sciences Symposium (TCS) 2018 – October 8-10, 2018 — Auburn University, Alabama

Auburn University is hosting the 2018 edition of the Thermal and Catalytic Sciences Symposium, October 8 – 10, 2018. Called TCS 2018, the event focuses on thermochemical biomass research and development and providing early career scientists and engineers an opportunity to present their research and interact with the senior researchers in the community.

Iowa State University's Bioeconomy Institute (BEI) held the first installment of the symposium in 2010 and co-hosted the event in 2014 with the National Renewable Energy Laboratory. RTI International hosted the event in 2016.

Topics to be covered at the symposium include biomass gasification and gas clean up, biomass gas to liquid, pyrolysis and upgrading, solvent liquefaction, and sugars via thermal deconstruction of cellulosic biomass. Other areas to be addressed are co-products upgrading and utilization, lignin utilization, biomass preprocessing and pretreatment, and technoeconomic analysis, life cycle analysis and policy analysis.

The Thermal and Catalytic Sciences Symposium has been held every other year following the first symposium held in 2010 at Iowa State University with the goal of focusing on thermochemical biomass research and development and providing early career scientists and engineers an opportunity to present their research and interact with the senior researchers in the community. 10th PALMEX Indonesia 2018 — October 9-11, 2018 — North Sumatera, Medan, Indonesia

The 10th PALMEX Indonesia 2018 is the only specialized Palm Oil event in Asia that brings together an international congregation of both upstream and downstream palm oil companies and also its supporting industries gathered in the capital city of North Sumatera, Medan to showcase the latest developments in the palm oil industry.

North Sumatera, home to one of Indonesia's largest concentration of oil palm plantations and also the presence of many supporting facilities such as palm oil processing plants making its capital Medan the perfect venue for the show. This unique event seeks to educate the public on the importance of the palm oil industry in Indonesia and the future trends of palm oil in the region. More than 7,000 industry professionals from more than 10 countries would be expected to turn up at this event. The international character and regional audience of PALMEX Indonesia 2018 provides unparalleled marketing, education and networking opportunities. [READ MORE](#)

Biofuels International Conference and Expo — October 10-11, 2018 — Berlin, Germany

Now in its 11th year, the acclaimed Biofuels International Conference and Expo will be taking place in Germany for the first time. With regulations and markets constantly evolving, it's becoming increasingly important to stay informed on this ever-changing landscape.

Not only will attendees benefit from the fantastic networking opportunities available but they will hear two-days of engaging talks from industry experts and discover the trends that will shape their biofuels plans for the near future.

Brought to you by Biofuels International, the leading international industry publication, this year's conference will be co-located with the International Biogas Congress & Expo as well as the International Biomass Congress & Expo, heralding this series of bio events as our largest gathering yet of bio related companies, giving participants unrivalled coverage.

VENICE2018 – 7th International Symposium on Energy from Biomass and Waste — October 15-18, 2018 — Venice, Italy

The production of energy from alternative sources and its impact on climate change are among the main strategic tools implicated in the sustainable development of our society. Numerous types of biomass and wastes contribute towards the production of energy and reduction in the use of fossil fuels by means of biological, chemical and thermal processes. Existing biomass and waste to energy technologies are currently undergoing rapid development. Despite growing interest

in the use of these technologies, in many countries their implementation remains limited.

The aim of the Venice 2018 Symposium is to focus on the advances made in the application of technologies for energy recovery from biomass and waste and to encourage discussion in these fields. The previous edition of the Symposium, held in 2016, was attended by over 500 scientists and operators from approximately 57 different countries.

The seventh edition of the Symposium will feature:

- Three days of scientific presentations
- One day of guided technical tours at biochemical and thermochemical plants
- Six parallel oral sessions, poster sessions and an exhibition by companies working in the field
- Expected attendance of over 600 delegates from tens of different countries worldwide [READ MORE](#)
