Federal Legislation

The **Green New Deal** or whatever climate legislation will be called should include renewable fuels for transportation as a key element. It has become clear that voices supporting and informing about biofuels are still needed at the tables where renewable energy is being discussed.

Carbon capture has become a hot topic; much of the **carbon capture and use** legislation favors oil/gas markets for that "use", however.

[Tax credit](#) extenders and other tax legislation is under review.

Advanced Biofuels USA Current Policy Analyses and Suggestions

Links to policy papers, statements and handouts can be found on the Advanced Biofuels USA home page. Or, [READ MORE](#)

For example, a suggestion for taxing the non-renewable part of transportation fuels is [here](#).

Back to [Table of Contents](#)

Joanne: **If you read some of these articles and say to yourself, "That's really important!"**, you understand the need for biofuels education. Biofuels is not an easy topic to understand.

Reporters (and those who read their articles and make purchasing and investing decisions based on them) may not have much background in renewable energy or transportation fuels and engines, let alone the intricacies and nuances of the places *where the rubber of policy meets the road of legislation, regulations and litigation. Heck, even the people working on those laws and regulations could use a refresher.*

We are doing something about that every day.

If you would like to help, please give me a call at 301-644-1395 or send an email to info @ AdvancedBiofuelsUSA.org. Or send a donation by clicking [HERE](#) or on the [DONATE](#) button below.

OR, we can earn our keep, too. Advertise with us. Contact me for details.

Thanks,
