Minnesota Bio-Fuels Association--A Model Hands-On Education Resource

If you have been following education posts on the Advanced Biofuels USA website, you have seen many stories about student visits to biorefineries in Minnesota.

The power behind those visits has been the Minnesota Bio-Fuels Association which runs an ethanol plant tour grant program to provide students (and their teachers) with a better understanding of biofuel production. This program should serve as a model for biofuels associations in other states and nationally.

In addition to the tour grants, Minnesota Bio-Fuels Association also provides classroom resources such as renewable fuels lesson plans and module courses from the National Future Farmers of America (FFA), educational videos that were developed with the Minnesota Department of Agriculture, and corn-to-ethanol demonstration kits.

Their goal is to raise teacher and student awareness biofuels through real life and in-person experiences.

We are working to understand the mechanisms by which substances are transported into, …

The Young African Leaders Initiative (YALI) is a signature effort to invest in the next generation of African leaders. President Obama launched YALI in 2010 to support young African leaders as they spur growth and prosperity, strengthen democratic governance, and enhance peace and security across Africa.

The Mandela Washington Fellowship for Young African Leaders brings 500 dynamic young African leaders, ages 25-35, from across the continent to the United States for 6 weeks of leadership training and mentoring at twenty U.S. universities and colleges in three areas: business and entrepreneurship, civic engagement and public administration. In 2014, the Fellows were also hosted in Washington, D.C. for a three-day Presidential Summit featuring a Town Hall with President Obama. Following their in-depth academic coursework and leadership training, some Fellows remained in the United States to participate in eight-week professional internships with American NGOs, private companies, and governmental offices. Selected from nearly 50,000 applications, participants in the 2014 Mandela Washington Fellowship for Young African Leaders represent the extraordinary promise of an emerging generation of entrepreneurs,
activists, and public officials. Upon returning to their home countries, the Fellows have access to professional
development opportunities, mentoring, networking and training, and seed funding to support their ideas, businesses,
and organizations.

Executive and Professional Training

Upcoming Ethanol Safety Seminars
The Renewable Fuel Association, in partnership with several industry entities, will be hosting a series of Ethanol Safety
Seminars in 2017 at various locations throughout the United States. This course was developed to give first responders,
hazmat teams, fuel transporters, and safety personnel an in-depth look at proper training techniques needed when
responding to an ethanol-related emergency. The seminars are FREE to attend. The upcoming cities for 2017 Ethanol
Safety Seminars are detailed below. To register, go to www.rfa.traincaster.com.

Online Ethanol Emergency Response Course
The Renewable Fuels Association is now offering an online version of its Ethanol Emergency Response course for first
responders.

The two-hour training course, offered in partnership with the International Association of Fire Chiefs (IAFC) and
TRANSCAER®, covers content from the “Training Guide to Ethanol Emergency Response,” which has recently been
updated.

This new online training is targeted towards emergency responders, but is open to anyone with interest in ethanol
emergency response. Upon completion of the course, participants will have knowledge related to ethanol and ethanol-
blended fuels, including the use, chemical and physical characteristics, transportation modes, transfer operations,
basics of foam, suggested responder tactics and strategies and environmental issues.

TerraTech on VoiceAmerica Wednesdays at 6AM Pacific Time
TerraTech highlights new and sustainable products, companies and cutting-edge advances in the lab that are changing the way people dress, eat, drink, drive, build, package, protect, monitor, maintain and get well. Each week, TerraTech features ...
