Coming Soon--Children’s Book on Climate Change

The Tantrum That Saved The World: Carbon Neutral Kids’ Book–Kickstart Campaign

Illustrator, Megan Herbert and climate scientist Michael E. Mann have teamed up to create a children's hard-cover and e-book about, as they explain in their Kickstart campaign:

To capture kids' imaginations, is a story about a little girl who comes face to face with an enormous challenge, feels all kinds of frustration as she tries to overcome it, and then channels those strong emotions into action, rallying all those around her to do the same.

Following this engaging, relatable tale, comes the explanation of the science of climate change in language that children can understand, telling the stories of the climate refugees that appear in the story, and how all their lives are interconnected.

An Action Plan then outlines simple and positive steps every person can take to make a real difference and to become the heroes of their own stories.

... This book is created by professionals in their field. The storytelling is exciting and well-structured. The writing is lyrical and engaging, with the fiction section presented in rollicking rhymes to keep children hooked into the story. The non-fiction section is based on meticulously-researched and peer-reviewed science, tempered and communicated in simple terms that children can understand. The illustrations complement and enhance the text, bringing it all together in a book that your children will want to hear again and again. READ MORE

Scholarships, Fellowships, Internships in the US and around the world

Green Chemistry for Life Grant Programme: Green Chemistry Research Grants for Young Scientists DEADLINE: February 28, 2018
The grant programme aims to promote the implementation of innovative research projects in green chemistry by young scientists that respect the 12 principles of green chemistry. …

Student Scientists Invited to Apply for Scholarship to National Biodiesel Conference (Deadline: Nov. 19, 2017)
October 11, 2017 – (National Biodiesel Board) The National Biodiesel Board is offering scholarships for students interested in attending the National Biodiesel Conference & Expo, Jan. 22 – 25 in Fort Worth, Texas. The application process for no cost registration, travel …

Renewable Fuels Foundation Offers National Ethanol Conference Scholarship Program
October 2, 2017 The NEC Scholarship Program, sponsored by the Renewable Fuels Foundation and the Renewable Fuels Association, seeks to attract students of higher learning who wish to pursue a career related to ethanol. By offering scholarships that …

Renewable Fuels Foundation Offers February 2017 National Ethanol Conference Scholarship Program
The NEC Scholarship Program, sponsored by the Renewable Fuels Foundation and the Renewable Fuels Association, seeks to attract students of higher learning who wish to pursue a career related to ethanol.

National Corn to Ethanol Research Center Internship Program
The NCERC biofuels internships are funded through a $10 million U.S. Department of Labor Trade Adjustment Assistance Community College and Career Training grant awarded in 2014. NCERC, which has a pilot plant, works with Southern Illinois University Edwardsville and its Lewis and Clark Community College on the Building Illinois Bioeconomy program. “What BIB does, is it takes this four-year university that we sit on at SIUE and our research center here at NCERC and it links up the activities here with four other community colleges across our state,” says Courtney Breckenridge, BIB project manager. “The areas we focused on with the grant were bioprocess and biofuels and water management.”

In addition to the technical jobs, NCERC recently added intern positions in business-oriented jobs. Up until about 2016, the internships were very STEM-oriented (science, technology, engineering and math). In 2017, they have added interns who have had degree fields such as accounting, public relations, etc.

Argonne Opens Call for Second Cohort of Chain Reaction Innovations
(U.S. Department of Energy/Newswise) Those who are selected for the Chain Reaction Innovations program will gain, among other things, access to Argonne National Laboratory’s world-class R&D infrastructure and technical expertise.

Bioenergy Internship & Fellowship Opportunities
(U.S. Department of Energy) The U.S. Department of Energy’s (DOE’s) Bioenergy Technologies Office (BETO) regularly engages interns and fellows in the sciences, engineering, and liberal arts through a variety of internship and fellowship programs, including …

Education Internships at Idaho National Laboratory
(Idaho National Laboratory) As a Department of Energy facility, INL offers a diverse number of paid internship positions to high school, undergraduate and graduate level students. These internship opportunities enable students to collaborate with experienced …

Association of Commonwealth Universities’ Early Career Academic Grants
Early Career Academic Grants are open to early career academics employed by ACU member universities, enabling them to participate in a conference held in a Commonwealth country other than their own. A minimum of 30 grants are on …

Research Experience for Undergraduates Summer Program
(Center for Bioplastics and Biocomposites ) Starting with the summer of 2017, the Center for Bioplastics and Biocomposites (CB2), will be establishing a new Research Experience for Undergraduates (REU) site designed to provide undergraduate students …

The REU program will continue for 3 years, i.e. Summer ‘17, Summer ‘18, and Summer ‘19.

Education Internships at Idaho National Laboratory
(Idaho National Laboratory) As a Department of Energy facility, INL offers a diverse number of paid internship positions to high school, undergraduate and graduate level students. These internship opportunities enable students to collaborate with experienced …
NIFA Announces $3.1 Million in Available Funding to Train the Next Generation of Agricultural Leaders
(U.S. Department of Agriculture) The U.S. Department of Agriculture’s (USDA) National Institute of Food and Agriculture (NIFA) today announced the availability of $3.1 million to train the next generation of agricultural leaders. This funding is …  NIFA grant website

Ciba Travel Awards in Green Chemistry
This annual green chemistry award sponsors the participation of students—from high school through graduate school—to attend an American Chemical Society (ACS) technical meeting, conference, or training program, having a significant green chemistry or sustainability component. …

CBMNet Funding Announcements; Includes Undergraduate Vacation Scholarships Various deadlines (Crossing Biological Membranes Network) At CBMNet we foster collaborations between academia and industry to tackle research challenges in Industrial Biotechnology and Bioenergy (IBBE). We are working to understand the mechanisms by which substances are transported into, …

The Young African Leaders Initiative (YALI) is a signature effort to invest in the next generation of African leaders. President Obama launched YALI in 2010 to support young African leaders as they spur growth and prosperity, strengthen democratic governance, and enhance peace and security across Africa.

The Mandela Washington Fellowship for Young African Leaders brings 500 dynamic young African leaders, ages 25-35, from across the continent to the United States for 6 weeks of leadership training and mentoring at twenty U.S. universities and colleges in three areas: business and entrepreneurship, civic engagement and public administration. In 2014, the Fellows were also hosted in Washington, D.C. for a three-day Presidential Summit featuring a Town Hall with President Obama. Following their in-depth academic coursework and leadership training, some Fellows remained in the United States to participate in eight-week professional internships with American NGOs, private companies, and governmental offices. Selected from nearly 50,000 applications, participants in the 2014 Mandela Washington Fellowship for Young African Leaders represent the extraordinary promise of an emerging generation of entrepreneurs, activists, and public officials. Upon returning to their home countries, the Fellows have access to professional development opportunities, mentoring, networking and training, and seed funding to support their ideas, businesses, and organizations.

Executive and Professional Training

Upcoming Ethanol Safety Seminars

The Renewable Fuel Association, in partnership with several industry entities, will be hosting a series of Ethanol Safety Seminars in 2017 at various locations throughout the United States. This course was developed to give first responders, hazmat teams, fuel transporters, and safety personnel an in-depth look at proper training techniques needed when responding to an ethanol-related emergency. The seminars are FREE to attend. The upcoming cities for 2017 Ethanol Safety Seminars are detailed below. To register, go to www.rfa.traincaster.com.

Online Ethanol Emergency Response Course

The Renewable Fuels Association is now offering an online version of its Ethanol Emergency Response course for first responders.

The two-hour training course, offered in partnership with the International Association of Fire Chiefs (IAFC) and TRANSCAER®, covers content from the “Training Guide to Ethanol Emergency Response,” which has recently been updated.

This new online training is targeted towards emergency responders, but is open to anyone with interest in ethanol emergency response. Upon completion of the course, participants will have knowledge related to ethanol and ethanol-blended fuels, including the use, chemical and physical characteristics, transportation modes, transfer operations, basics of foam, suggested responder tactics and strategies and environmental issues.

TerraTech on VoiceAmerica Wednesdays at 6AM Pacific Time

TerraTech highlights new and sustainable products, companies and cutting-edge advances in the lab that are changing the way people dress, eat, drink, drive, build, package, protect, monitor, maintain and get well. Each week, TerraTech features …
