Joanne: If you read some of these articles and say to yourself, "That’s really important!", you understand the need for biofuels education. Biofuels is not an easy topic to understand.
Reporters (and those who read their articles and make purchasing and investing decisions based on them) may not have much background in renewable energy or transportation fuels and engines, let alone the intricacies and nuances of the places where the rubber of policy meets the road of legislation, regulations and litigation. Heck, even the people working on those laws and regulations could use a refresher.

We are doing something about that every day.
