Domtar Honored with Biorenewable Deployment Consortium's Forest Products Innovation Award

Montréal, QB, Canada, September 10, 2019—The Biorenewable Deployment Consortium (BDC) honored Domtar with the organization's inaugural 2019 Forest Products Innovation Award for their culture of innovation in the deployment of new biorenewable processes directed toward achieving the highest value from the tree.

“BDC is proud to honor Domtar as the first recipient of its Fall 2019 Forest Products Innovation Award,” said BDC Treasurer and Co-Founder Harry Seamans. “Domtar is a great example of a company that has developed a culture that is willing to be first in the deployment of biorenewable processes that will add new products, add value to operations, and make the company more viable for the future. Domtar is a leader in adding value to Kraft lignin through the production of higher value commercial products.”

“It is a honor for us to be recognized by BDC and this award is special to us because we do consider ourselves to have an innovative strategy. We accept this award on behalf of our worldwide team who are dedicated to innovation in the area of biorenewable products and processes,” said Stewart Marcoux, Vice President of BioMaterials, who received the award on behalf of Domtar.

About BDC

BDC, since 2006, has worked to bring together like-minded companies to share ideas and partner to deploy bio-processes that can be economic in the long run without government subsidy, by investigating new processes, being a resource, brokering partnerships, and holding two forums a year for its members, where leading edge information from various bio-companies is shared and tours are made of bio-facilities. BDC recognizes the need for low cost feedstock, cost effective measures such as integration of processes, high value products, and good management to achieve the economics needed for success. For more information, visit BDC at www.biorenewabledc.org.

About Domtar

Domtar designs, manufactures, markets, and distributes a wide variety of pulp, paper and personal care products globally. They are the largest integrated manufacturer and marketer of uncoated freesheet paper in North America, and one of the largest manufacturers of pulp in the world. Their network of 13 pulp and paper mills and 10 paper converting facilities gives them 3 million tons of papermaking capacity and 1.8 million air-dried metric tons of market pulp capacity annually. Domtar's Personal Care division was created in 2011 with the purchase of Attends Healthcare, and has since grown through multiple strategic acquisitions and investments. Today, Domtar is a leading manufacturer of high-quality and innovative absorbent hygiene products with five manufacturing plants that serve customers primarily in North America and Europe. Domtar has 28 manufacturing facilities located around the world with a focus on safety, quality and sustainability. For more information, visit Domtar at www.domtar.com.
